

SPECIAL SYMBOLS AND FEATURES

JACK

A lucky leprechaun who activates features to help you win big!

WILDS

There are 4 types of WILD scatters - BEER, PIPE, RAINBOW and HAT. They act as normal WILD symbols and each one activates a different feature when part of a winning cluster.

MAGIC PIPE

When it forms part of a winning cluster, the Pipe Wild triggers Jack to blow his pipe. One or more high-paying symbols then expand to become MEGA TILES (2x2, 3x3, 4x4). High-paying symbols are the four symbols in the upper row of the Symbol Wins payable.

BEER REELS

When it forms part of a winning cluster, the Beer Wild triggers Jack to drink his beer. Taps then start pouring beer on random reels! The selected BEER REELS will be covered in identical symbols for the chance of bigger clusters!

RAINBOW SWAPS

When it forms part of a winning cluster, the Rainbow Wild triggers a giant rainbow which lands on the reels swapping random tiles for identical symbols!

HAT TRICK

When it forms part of a winning cluster, the Hat Wild triggers Jack to throw his hat in the air. It then sucks low-paying symbols from the reels for the chance of bigger wins! Low-paying symbols are the five symbols in the lower row of the Symbol Wins payable.

CLOVER SYMBOL

Scatter symbol which can land on any reel during the normal game.

FREE SPINS

Collect 4 CLOVER symbols in one spin or in consecutive respins to activate 10 FREE SPINS.

FEATURE FRENZY IN FREE SPINS

All WILDS collected during FREE SPINS are activated one after the other once the last spin has taken place.

HOW TO PLAY JACK IN A POT

Total Stake

The Total Stake is the total of stakes per line. You can adjust it at any time, using the + or – buttons.

Spin the Reels

If you are playing on desktop, click the Spin button or press the spacebar to spin.

Speed up each reel spin by pressing spacebar again, or by clicking on the reels. For TURBO SPIN, hold down the spacebar or the Spin button.

Autoplay

Press the AUTO button to commence automatic play of the game at the currently selected stake. Select how many spins to play via the Total Spins Dropdown menu.

More Autoplay settings

Select the loss limit: The Autoplay will stop at the last spin before the loss limit is reached. The Autoplay loss limit should be higher than your stake.

Expand the AUTOPLAY dialog by choosing MORE AUTOPLAY SETTINGS. Here you can select additional criteria for the AUTOPLAY stop including - Stop if single win exceeds certain amount; Stop on Bonus Feature.

Gamble Wheel

After a spin which results in a win of more than 0.10 GBP, the "Gamble" button is activated and the player may enter the Gamble game for a chance to increase their win.

The Gamble Wheel offers the player true odds and always plays 100% randomly with 100% RTP. The player can configure the Gamble using the following options:

Pressing the plus button increases the potential win on the ladder and recalculates the wheel's chances. Pressing the minus button decreases the potential win. The green section of the wheel displays the exact chance of winning. The red section displays the exact chance of losing. If the player commits to pressing the Gamble button, the pointer within the wheel will spin. If the pointer lands in the green area, the player wins the highlighted prize which they chose in advance. If the pointer lands on the red area the Gamble is over and the player returns to the slot game.

The player doesn't have to collect the winnings manually. They are auto-collected after every Gamble round. Press the "Collect" button to collect your winnings and return to the slot game.

If the Gamble feature is closed, the player cannot return to the feature unless they win another round in the slot game. The Gamble feature is disabled during auto-play. Jackpot winnings cannot be gambled.

General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

The prize value from one payline is equal to the total stake divided by the number of paylines, multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

Example: Total stake is 2. Total paylines are 20. Symbol multiplier for length of 5 is 300. The win for 1 payline with this symbol and length would be calculated as such: $2 / 20 * 300 = 30$.

The prize value from one payline in a Multiline game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid.

Example: Stake is 2. Symbol multiplier for length of 5 is 20. The win for 1 payline with this symbol and length would be calculated as such: $2 * 20 = 40$.

The prize value from one way or cluster in a Ways or Winning Clusters game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed.

Example: Total stake = 2. Symbol win multiplier = 2. Win = $2 * 2 = 4$.

During the Free Spins bonus rounds, the game uses a different set of reel strips.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.

Please be aware that each account allows only a single game to be played at any one time. Therefore, a game should not be played on more than one device, or multiple games on the same device simultaneously. Doing so may lead to various errors.

In case of an incomplete game round due to connection loss where the result has not yet occurred, the game will generate an outcome for the round, which will be shown upon restoring of connection and the result will be visible in the Game History after refreshing the game.

In case of an incomplete game round due to connection loss where the result has occurred, but the player could not be informed of this fact, the game will inform the player of the outcome upon refreshing of the game and the result will be visible in the Game History.
