

## SPECIAL SYMBOLS AND FEATURES

### CHAIN REACTION

Symbols forming wins disappear, making way for new symbols to drop in that may form new wins.

### FEATURES

Each of the girls in the game offers a specific feature and may trigger it randomly when she is active. A girl is active when her portrait is shown in the top right corner of the slot. When a girl activates her feature the next girl becomes active. The initial order in which the girls appear, and the features they each trigger, are as follows:

Pink girl – Make it large!

Blue girl – Get one free!

Yellow girl – Win multiplier!

### MAKE IT LARGE

The Pink girl swaps all instances of one symbol type which have landed on the slot for another symbol type.

### GET ONE FREE

The blue girl chooses one symbol type and doubles it. The tile remains the same size, but the number of symbols it is counted as is doubled. The double symbols correspond to two symbols when determining the win in the spin.

### WIN MULTIPLIER

The yellow girl awards a multiplier of x2, x3, x4 or x5 for the wins in the respin and the following chain reactions.

### FREE SPINS

3 FREE SPINS scatters anywhere on the screen award 8 FREE SPINS. In FREE SPINS the girls' features activate randomly and more than one feature can be activated in the same spin.

During FREE SPINS any WIN MULTIPLIERS awarded by the yellow girl are stacked. The overall multiplier may rise up to x30 and resets at the end of the bonus round.

A special progress bar is active during FREE SPINS. Win combinations with girl symbols contribute to filling it up. Each girl that participates in a win combination contributes with 1 step to the progress. A double girl symbol contributes with 2 steps. The progress has 36 steps in total. When filled, the progress bar awards 8 bonus spins.

#### Gamble Wheel

After a spin which results in a win of more than 0.10 EUR, the "Gamble" button is activated and the player may enter the Gamble game for a chance to increase their win.

The Gamble Wheel offers the player true odds and always plays 100% randomly with 100% RTP. The player can configure the Gamble using the following options:

Pressing the plus button increases the potential win on the ladder and recalculates the wheel's chances. Pressing the minus button decreases the potential win. The green section of the wheel displays the exact chance of winning. The red section displays the exact chance of losing. If the player commits to pressing the Gamble button, the pointer within the wheel will spin. If the pointer lands in the green area, the player wins the highlighted prize which they chose in advance. If the pointer lands on the red area the Gamble is over and the player returns to the slot game.

The player doesn't have to collect the winnings manually. They are auto-collected after every Gamble round. Press the "Collect" button to collect your winnings and return to the slot game. If the Gamble feature is closed, the player cannot return to the feature unless they win another round in the slot game. The Gamble feature is disabled during auto-play. Jackpot winnings cannot be gambled.
