

GAME PROJECT

Game Name: Premium Atlantic City Blackjack

Game Rules

In Premium Atlantic City Blackjack four 52-card decks are used. The decks are shuffled together before every hand is dealt, and dealer receives a hole card. Dealer must hit on all totals of 16 or under and stand on all 17s (including soft 17, a hand featuring an ace that totals either seven or 17). Should you hit Blackjack you will be paid at 3:2 odds.

Player Betting Options

A minimum bet applies on Premium Atlantic City Blackjack tables, but more betting options become available as hands progress. Players can double down on any two-card hand, meaning you can double your initial bet, so long as you are committed to 'standing' after being dealt one additional card.

Player can also split two cards if they are paired or of equal value. So, if you are dealt nine-nine, king-queen, seven-seven or jack-ten you can create two hands for an additional wager of the same amount. Here are some additional rules on splitting:

- Players can split once times for a total of two hands, except when dealt a pair of aces
- Aces may be split only once, after which players will receive only one card for each split hand
- Players can double down on any hand, including after a non-ace split

Insurance and Surrender

When playing at Atlantic City Blackjack tables, players can surrender their hand and lose half his bet only after the dealer checks for blackjack. Surrender is offered after all initial cards have been dealt. If you think the dealer has Blackjack, you can also buy 'insurance'. This means should the dealer reveal Blackjack; you'll still be paid 2:1 on your bet.

Player Tables

Our tables allow you to play up to five betting positions (or 'boxes') per game round. Just click on one or more boxes to place a wager.

If you lose your connection or are timed out in the middle of a hand, you won't lose any wagers made. Instead, the game state is stored and the hand is completed the next time you log in. The dealer's hole card will be re-dealt.

Premium Atlantic City Blackjack Return to Player

The theoretical return to player (RTP) for Premium Atlantic City Blackjack is approximately 99.67%.
