

Gold Blitz™ Ultimate™

About this Game

The objective of the game is to spin the reels so the symbols land in different combinations.

Winning combinations are highlighted on the reels and a payout is awarded.

Way Rules

This game includes 6400 ways.

A way is a pattern of adjacent symbol positions that runs across the reels.

A win is awarded when matching symbols land adjacent to each other in this pattern.

Way wins run from left to right, starting from the first slot reel.

Bet Rules

Each spin played costs a total bet amount.

The total bet is based on the initial bet placed, multiplied by the cost of the ways played.

The bet multiplier is 10.

The initial bet is the current total bet divided by the way cost of 10.

Payout Rules

Way win payouts are based on the initial bet placed.

The payout value is based on the winning combination formed.

The total payout is the sum of all way wins and Scatter wins resulting from a spin.

If multiple winning combinations land on a single way, only the highest win is awarded.

Only the highest winning combination is awarded per symbol combination.

The Paytable displays the payout for each symbol combination based on the current bet.
