

SPECIAL SYMBOLS AND FEATURES

WILD

The WILD symbol substitutes for all paying symbols which can participate in a win line. Additionally the awards from any win lines in which one or more WILDS participate are tripled.

GOLD & PLATINUM RECORDS

Gold and Platinum Records are scatters that may land anywhere on the reels. They do not participate in win lines and instead hold a monetary value representing a stake MULTIPLIER. Gold Records hold between 1x and 5x your current stake and Platinum Records may hold any of the following multipliers:

7x, 10x, 12x, 15x, 20x, 25x.

The prizes held by the record symbols can be won during the LOCK THE RECORDS feature.

During the normal game both Gold and Platinum record symbols may lock for between 1 and 5 spins when they land to increase the chance of triggering the feature.

LOCK THE RECORDS

Landing any 3 record symbols anywhere on the reels starts THE LOCK THE RECORDS feature with 3 FREE RESPINS. Landing 4 records grants 4 FREE RESPINS. Landing 5 records grants 5 FREE RESPINS.

During LOCK THE RECORDS all records that triggered the feature will be locked in place and RESPINS with only record symbols will begin. The number of RESPINS available is determined by the number of records that triggered the feature. Each new record that lands resets the RESPINS back to their initial count and also remains locked in place for the duration of the bonus round.

Each new record that lands also adds its prize to every other record present on the slot. If two or more records land in the same RESPIN they do not boost each other's prizes, but only those of the records locked in previous RESPINS.

The feature ends if no new records land for the duration of the count of RESPINS awarded at the start of the bonus round.

When the LOCK THE RECORDS feature ends the total win amount accumulated by the records present on the slot is paid out. In addition, a full screen of records doubles that award.

HOW TO PLAY ROCK 'N' LOCK

Game Progress

Any progress features in the game, including symbols locked onto the reels which affect subsequent spins, are saved for your game at the stake level you are playing at.

You can have different progress levels at different stakes on the same game, and move between them by changing the stake.

If you are awarded free spins from a promotional campaign any progress in the main game including any locked symbols, will be saved and be available to continue playing at the same stake once the free spins have been completed.

Please note that this stateful game saves its state forever.

Total Stake

The Total Stake is the total of stakes per line. You can adjust it at any time, using the + or – buttons.

Spin the Reels

If you are playing on desktop, click the Spin button or press the spacebar to spin.

Autoplay

Press the AUTO button to commence automatic play of the game at the currently selected stake. Select how many spins to play via the Total Spins Dropdown menu.

More Autoplay settings

Select the loss limit: The Autoplay will stop at the last spin before the loss limit is reached. The Autoplay loss limit should be higher than your stake.

Expand the AUTOPLAY dialog by choosing MORE AUTOPLAY SETTINGS. Here you can select additional criteria for the AUTOPLAY stop including - Stop if single win exceeds certain amount; Stop on Bonus Feature.

Gamble Wheel

After a spin which results in a win of more than 0.10 EUR, the "Gamble" button is activated and the player may enter the Gamble game for a chance to increase their win.

The Gamble Wheel offers the player true odds and always plays 100% randomly with 100% RTP. The player can configure the Gamble using the following options:

Pressing the plus button increases the potential win on the ladder and recalculates the wheel's chances. Pressing the minus button decreases the potential win. The green section of the wheel displays the exact chance of winning. The red section displays the exact chance of losing. If the player commits to pressing the Gamble button, the pointer within the wheel will spin. If the pointer lands in the green area, the player wins the highlighted prize which they chose in advance. If the pointer lands on the red area the Gamble is over and the player returns to the slot game.

The player doesn't have to collect the winnings manually. They are auto-collected after every Gamble round. Press the "Collect" button to collect your winnings and return to the slot game. If the Gamble feature is closed, the player cannot return to the feature unless they win another round in the slot game. The Gamble feature is disabled during auto-play. Jackpot winnings cannot be gambled.

General types of games

Check the pays menu in the game paytable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

Winning combinations and payouts are made according to the Paytable.

If you are playing a Lines game, the prize value from one payline is equal to the total stake multiplied by the symbol multiplier advertised in the Paytable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

If you are playing a Ways or a Cluster game, the prize value from one way or winning cluster is equal to the payout advertised in the paytable. Where multiple wins occur on multiple ways or clusters, the total win values are summed. If more than one win occurs on the same way or cluster, the largest win is paid. If more than one win occurs on the same way or cluster, the largest win is paid.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.

Please be aware that each account allows only a single game to be played at any one time. Therefore, a game should not be played on more than one device, or multiple games on the same device simultaneously. Doing so may lead to various errors.

In case of an incomplete game round due to connection loss where the result has not yet occurred, the game will generate an outcome for the round, which will be shown upon restoring of connection and the result will be visible in the Game History after refreshing the game. In case of an incomplete game round due to connection loss where the result has occurred, but the player could not be informed of this fact, the game will inform the player of the outcome upon refreshing of the game and the result will be visible in the Game History.
