

Game Basics

Jack Hammer™ 4: Chasing the Dragon is a 6-reel, 6-row video slot with the Cluster Pays™ mechanics, Sticky Win™ feature with Re-Spins, 4 Wild features, 4 special features in Free Spins, and the Elevate Feature with 5 options.

The game is played with clusters of symbols, with wins awarded for clusters of 6 or more of the same symbols. A symbol is part of a cluster if it is horizontally or vertically adjacent to the same symbol. Only the highest win per cluster is paid.

A cluster win is equal to the value shown in the Paytable multiplied by any applicable multipliers. Symbol payout values shown in the Paytable are dynamic and change in accordance with the selected bet value.

Sticky Win™ Feature

The Sticky Win™ feature is activated in the main game and awards a Re-Spin. The feature is activated when there is at least one cluster win or/and 3 Scatter symbols on the reels.

During Re-Spins, the cluster win or/and Scatter symbols remain on the reels until the end of Re-Spins. Another Re-Spin is awarded when another symbol or symbols are added to the cluster win, or the fourth Scatter symbol appears on the reels. Re-Spins end when no new symbols are added to cluster wins present on the reels or the number of Scatter symbols reaches 5. The wins are awarded for the last Re-Spin.

Re-Spins are played at the same bet as the round that activated Re-Spins. At the end of Re-Spins, the total win from it is added to any wins from the round that activated Re-Spins.

Wild Features

The reels have four corner positions that can be only filled with a Question symbol or different types of Wild symbols. When any corner position becomes

a part of a cluster win, the Wild symbol activates its respective Wild feature, the Question symbol transforms into a Wild symbol according to the table below, and its feature is activated.

	Wild Symbols	Question symbols

Wild symbols substitute for all symbols except for Scatter symbols. Wild symbol substitution pays the highest possible winning combination in a cluster according to the Paytable

Free Spins

5 Scatter symbols appearing on the reels award 3 Free Spins. The Free Spins start with 3 multiplier symbols on the play area. During the Free Spins, only multiplier symbols can land on the reels. Every time a multiplier symbol lands on the reels during Free Spins, the number of Free Spins in the Free Spins counter is reset to 3.

During the Free Spins, 4 different features (Unlock, Generate, Double, and Collect) randomly appear in all four corner positions of the play area and remain on the reels till the end of Free Spins. The features are activated when at least one multiplier symbol lands on any position adjacent to the corner position.

The Unlock feature can only be activated during Free Spins twice. When the feature is activated the first time, the top row is added to the play area. When the Unlocker feature is activated the second time, the bottom row is added to the play area.

When the Generate feature is activated, 3 multiplier symbols are randomly placed anywhere on reels. The feature can be activated up to three times until the Collect feature is activated.

The Double feature doubles the values of all multipliers that activate the Doubler feature as well as the multipliers adjacent to them. It can be activated up to three times until the Collect feature is activated.

When the Collect feature is activated, all the multipliers present on the reels are added and removed from the reels. The value of the added multipliers is shown by the Collect feature symbol and applied to the total win of Free Spins at the end of Free Spins.

If all four Free Spins features are triggered simultaneously, they are activated in the following order: Generate feature, Unlock feature, Double feature, Collect feature.

Free Spins are played at the same bet as the round that activated Free Spins, and Free Spins end when the Free Spins counter reaches 0. At the end of Free Spins, the total win from Free Spins is added to any wins from the round that activated Free Spins, and the game returns to the round that activated Free Spins.
