

## **SPECIAL SYMBOLS AND FEATURES**

### **WILD**

The WILD symbol can land on any reel except for the very first and last reel, regardless of the expansions of the slot. The WILD symbols get modifiers depending on the progress stage the player has reached.

Wild symbols substitute for all paying symbols and count as the symbol which forms the longest winning combination on a single win way.

### **PROGRESSION**

Stage 1, the starting stage, is Macedonia and the slot layout is 5x3. The game progress starts in Macedonia. A progress bar above the reels fills up by landing Aristotle scatters anywhere on the reels. Only one Aristotle scatter symbol can land on the reels in a single spin.

Each section of the bar symbolises the next conquered area. To move on to Egypt you need to land 10 Aristotle symbols in total. To move on to Babylonia you need 20 Aristotle scatters in total. To get to the final stage (Persia) you would need 30 Aristotle scatters in total.

To summarise, 10 Aristotle scatters are needed in each of the 3 stages, in order to progress to the next stage.

When the progress indicator reaches the final point of each section of the bar, the game moves you to the next area. The map behind the reel is brought into focus and displays the conquest progress, and the benefits that come with it are displayed before continuing on to the next stage.

### **CONQUEST OF EGYPT**

When moving on to Stage 2 of the progression levels (Egypt), the slot is expanded downwards with 1 extra row, transforming it into 5x4 layout, with 1,024 WAYS to win.

### **CONQUEST OF BABYLONIA**

When moving on to Stage 3 of the progression levels (Babylonia), the slot is expanded to the right with 1 extra reel, transforming it into 6x4 layout, with 4,096 WAYS to win.

Furthermore, WILD symbols now have a chance to land accompanied by a multiplier between x2 and x5.

### **CONQUEST OF PERSIA**

When moving on to Stage 4 of the progression levels (Persia), the slot is expanded downwards with 1 extra row, transforming it into 6x5 layout, with 15,625 WAYS to win.

Furthermore, WILD symbols now have the chance to stick in the normal game for a random number of spins between 1 and 5. During the Alexander's Treasure bonus, the WILD symbols stick for the entire duration of the feature.

## **ALEXANDER'S TREASURE**

When 3 FREE SPINS scatters land on the reels, Alexander's Treasure is activated. Free Spins Scatters may reels 1, 3 and 5 when the slot grid is 5x3 and 5x4, and on reels 1, 3, 4 and 6 when the grid is 6x4 and 6x5.

The FREE SPINS scatters flip on the screen and their reverse sides reveal a number between 1 and 7. The combination of the numbers on each coin is equal to the amount of FREE SPINS given for the bonus. Therefore, the FREE SPINS feature can award between 3 and 21 spins in total.

Aristotle scatters do not land during the Alexander's Treasure bonus round.

During Alexander's Treasure a FREE SPINS scatter can land anywhere on the reels, which will re-trigger the feature and add between 1 and 7 extra FREE SPINS depending on the number on the reverse side of the FREE SPINS symbol. Only one can land at a time.

## **HOW TO PLAY ALEXANDER THE GREAT: WORLD CONQUEROR**

### **Game Progress**

Any progress features in the game, including symbols locked onto the reels which affect subsequent spins, are saved for your game at the stake level you are playing at.

You can have different progress levels at different stakes on the same game, and move between them by changing the stake.

If you are awarded free spins from a promotional campaign any progress in the main game including any locked symbols, will be saved and be available to continue playing at the same stake once the free spins have been completed.

Please note that this stateful game saves its state forever.

### **Total Stake**

The Total Stake is the total of stakes per line. You can adjust it at any time, using the + or – buttons.

### **Spin the Reels**

If you are playing on desktop, click the Spin button or press the spacebar to spin.

### **Jackpot Game**

Win one of the offered jackpot tiers when three or more jackpot symbols appear on the reels or the jackpot is triggered by a game feature. The chances of winning a jackpot increase in correlation with the size of the stake played. The jackpot is triggered randomly and can be won by playing any of the linked jackpot games. To win the jackpot, the player is not required to make any decision other than to spin the reels. The stake value cannot be changed during free spins. Internet connectivity issues may cause delays in jackpot messages or updates, but they do not affect actual jackpot wins. It is not possible for two players to win the same jackpot. In the event two jackpot winnings occur close to one another the jackpot will be assigned in their respective order. Due to connectivity issues the jackpot value displayed may differ from the effective jackpot value. The jackpot could be temporary deactivated, when this occurs all contributions are paused. The jackpot amount available upon reactivation will be the same as before the deactivation.

The rules for Jackpot discontinuation and Jackpot fund allocation are defined by each Operator at their own discretion.

#### Progressive Jackpot

The progressive jackpot is accumulated by all stakes on games offering these jackpots and, in some cases, the jackpots may be offered on multiple websites. A percentage of each total bet is added to a common pot. Part of this contribution is used to form the progressively increasing jackpot amounts, and the other part, contributes to a seed fund, which is the minimum amount of money guaranteed to be made available to players after a jackpot is won by qualifying players. Once the jackpot has been won, a new progressive jackpot will be made available and the process repeats. The jackpot can be triggered and won by a single spin from a single user only. The jackpot does not have a ceiling value. The odds of winning the jackpot increases with the size of the jackpot and can be won at any time. When the jackpot is won by another player, a notification appears in the jackpot panel. Once won, the amount is transferred directly to the user wallet, even if it is won during a bonus spin.

#### General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

The prize value from one payline is equal to the total stake divided by the number of paylines, multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

Example: Total stake is 2. Total paylines are 20. Symbol multiplier for length of 5 is 300. The win for 1 payline with this symbol and length would be calculated as such:  $2 / 20 * 300 = 30$ .

The prize value from one payline in a Multiline game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid.

Example: Stake is 2. Symbol multiplier for length of 5 is 20. The win for 1 payline with this symbol and length would be calculated as such:  $2 * 20 = 40$ .

The prize value from one way or cluster in a Ways or Winning Clusters game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed.

If more than one win occurs on the same way or cluster, the largest win is paid.

Example: Total stake = 2. Symbol win multiplier = 2. Win =  $2 \times 2 = 4$ .

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.

Please be aware that each account allows only a single game to be played at any one time. Therefore, a game should not be played on more than one device, or multiple games on the same device simultaneously. Doing so may lead to various errors.

In case of an incomplete game round due to connection loss where the result has not yet occurred, the game will generate an outcome for the round, which will be shown upon restoring of connection and the result will be visible in the Game History after refreshing the game.

In case of an incomplete game round due to connection loss where the result has occurred, but the player could not be informed of this fact, the game will inform the player of the outcome upon refreshing of the game and the result will be visible in the Game History.

#### Gaming session information

"Gaming session" is considered the time since the current game has been opened, until the time it is closed. Opening the game again from the lobby, or reloading the game in the browser is considered a new gaming session.

"Session timer" is being measured for the current gaming session only.

"Net position" is being based on the current gaming session only, calculating "all real money wins minus all real money bets."

For the best gaming experience, use of the latest version of software is recommended. Malfunction voids all pays and plays.

The RTP is  $\approx$  XX.XX% which includes base game RTP and jackpot contribution.

Minimum stake: \$x.xx

Maximum stake: \$x.xx
