FEATURES DESCRIPTION

SKIING WILDS

Slope Scatters can land only on reels 2, 3, and 4, where each Slope Scatter awards a random Skiing path through the slot, which will be filled with WILDs. Skiing WILDs paths can be Downhill (WILD clones downwards), Super G (WILD clones diagonally) and Free Ride (WILD clones in a zig zag pattern). A single Slope Scatter can land per reel. Wilds can't land over Free Spins Scatter.

WILD STORM

Sometimes 3 to 6 random WILD x2 appear anywhere on the reels. The WILD x2 multiply only the winning lines in which they participate. When several WILD x2 are part of a winning line they multiply and can add up to x16.

SUMMER BREEZE

At random, a symbol that formed one or more winning lines bigger than the stake can be swapped for a random higher paying symbol for bigger wins. The feature guarantees a win and only the final screen pays. Wild symbols can't upgrade the winning lines. The feature can't be triggered if there are Slope Scatters on the reels or 3 Free Spins Scatters.

SKI FOR FREE

3 Free Spins Scatters on reels 1,3 and 5 award instantly 7 free spins. On every spin up to 3 of the Skiing Wilds or Wild Storm features are awarded, and each spin is a win. A re-trigger can occur if 3 Free Spins Scatters land on the screen, awarding 7 more free spins. The Slope Scatters and the Summer Breeze feature are excluded from free spins. The maximum number of free spins per round is 56. Free Spins wins are paid in addition to any line wins achieved before entering the bonus.

The prize value of a single payline is equal to the total stake divided by the number of total paylines for the game, multiplied by the symbol multiplier presented in the payable. In cases where multiple wins occur on multiple win lines in the same spin, their total win values are summed. If more than one win occurs on the same payline, only the largest win is paid.

Example: The total stake is 2. The total paylines are 20. The symbol multiplier for 5 identical landed symbols is 300. The win for a single payline would be calculated as follows: $(2 / 20) * 300 = 30$.

The prize value from one way or a cluster in a Ways or Winning Clusters game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur in multiple ways or clusters, the total win values are summed.

Example: Total stake = 2. Symbol win multiplier = 2. Win = $2 \times 2 = 4$.

Any Scatter Symbol wins will be paid in addition to any other symbol wins occurring on the same spin.
