Total Stake

The Total Stake is the total of stakes per line. You can adjust it at any time, using the + or – buttons.

Spin the Reels

If you are playing on desktop, click the Spin button or press the spacebar to spin.

Autoplay

Press the AUTO button to commence automatic play of the game at the currently selected stake. Select how many spins to play via the Total Spins Dropdown menu.

More Autoplay settings

Select the loss limit: The Autoplay will stop at the last spin before the loss limit is reached. The Autoplay loss limit should be higher than your stake.

Expand the AUTOPLAY dialog by choosing MORE AUTOPLAY SETTINGS. Here you can select additional criteria for the AUTOPLAY stop including - Stop if single win exceeds certain amount; Stop on Bonus Feature.

Gamble Wheel

After a spin which results in a win of more than 0.10 EUR, the "Gamble" button is activated and the player may enter the Gamble game for a chance to increase their win.

The Gamble Wheel offers the player true odds and always plays 100% randomly with 100% RTP. The player can configure the Gamble using the following options:

Pressing the plus button increases the potential win on the ladder and recalculates the wheel's chances. Pressing the minus button decreases the potential win. The green section of the wheel displays the exact chance of winning. The red section displays the exact chance of losing. If the player commits to pressing the Gamble button, the pointer within the wheel will spin. If the pointer lands in the green area, the player wins the highlighted prize which they chose in advance. If the pointer lands on the red area the Gamble is over and the player returns to the slot game.

The player doesn't have to collect the winnings manually. They are auto-collected after every Gamble round. Press the "Collect" button to collect your winnings and return to the slot game.

If the Gamble feature is closed, the player cannot return to the feature unless they win another round in the slot game. The Gamble feature is disabled during auto-play. Jackpot winnings cannot be gambled.

Jackpot Game

Win one of the offered jackpot tiers when three or more jackpot symbols appear on the reels or the jackpot is triggered by a game feature. The chances of winning a jackpot increase in correlation with the size of the stake played. The jackpot is triggered randomly and can be won by playing any of the linked jackpot games. To win the jackpot, the player is not required to make any decision other than to spin the reels. The stake value cannot be changed during free spins. Internet connectivity issues may cause delays in jackpot messages or updates, but they do not affect actual jackpot wins. It is not possible for two players to win the same jackpot. In the event two jackpot winnings occur close to one another the jackpot will be assigned in their respective order. Due to connectivity issues the jackpot value displayed may differ from the effective jackpot value. The jackpot could be temporary deactivated, when this occurs all contributions are paused. The jackpot amount available upon reactivation will be the same as before the deactivation.

The rules for Jackpot discontinuation and Jackpot fund allocation are defined by each Operator at their own discretion.

Progressive Jackpot

The progressive jackpot is accumulated by all stakes on games offering these jackpots and, in some cases, the jackpots may be offered on multiple websites. A percentage of each total bet is added to a common pot. Part of this contribution is used to form the progressively increasing jackpot amounts, and the other part, contributes to a seed fund, which is the minimum amount of money guaranteed to be made available to players after a jackpot is won by qualifying players. Once the jackpot has been won, a new progressive jackpot will be made available and the process repeats. The jackpot can be triggered and won by a single spin from a single user only. The jackpot does not have a ceiling value. The odds of winning the jackpot increases with the size of the jackpot and can be won at any time. When the jackpot is won by another player, a notification appears in the jackpot panel. Once won, the amount is transferred directly to the user wallet, even if it is won during a bonus spin.
