

Countess Cash™

About this Game

This is a 5 reel 3 row video slot game.

The objective of the game is to spin the reels so the symbols land in different combinations.

Winning combinations are highlighted on the reels and a payout is awarded.

Bet Rules

Each spin played costs a total bet amount.

The initial bet is the number of coins multiplied by the coin size.

The total bet is based on the initial bet placed, multiplied by the bet multiplier played.

This game includes a bet multiplier of 10.

The bet multiplier played is fixed.

Payline Rules

This game includes 25 paylines.

The number of paylines played is fixed.

A payline is a pattern of adjacent symbol positions that runs in a line across the reels.

Payline wins run from left to right, starting from the first slot reel.

Payline wins are awarded when matching symbols land adjacent to each other on a payline.

Payout Rules

Payline win payouts are based on the initial bet placed.

If multiple winning combinations land on a single payline, only the highest win is awarded.

Winning combination payouts are based on the initial bet placed.

The total payout is the sum of all winning combination wins resulting from a spin.

Disclaimer: The Paytable displays the payout for each symbol combination based on the current bet.
