

SPECIAL SYMBOLS AND FEATURES

CHAIN REACTION

Symbols forming wins disappear, making way for new symbols to drop in that may form new wins.

PINATAS

Three different pony pinatas are placed above the reels – Small Pinata, Big Pinata and Super Pinata. Bigger pinatas give bigger rewards.

The pinatas are asleep during the normal game but may activate randomly to award a random MULTIPLIER. This is applied at the end of the spin to all wins in the current spin. During SWEET SPINS the multipliers awarded by the pinatas are not reset before the end of the bonus round. Instead they are stacked and applied to all winning spins. The maximum multiplier which may be accumulated by the pinatas during SWEET SPINS is 30x.

MULTIPLIER

The following multipliers may be awarded by the pinatas:

Small Pinata: 2x, 3x, 5x;

Big Pinata: 6x, 7x, 10x;

Super Pinata: 11x, 12x, 15x;

SWEET SPINS

3 or more SWEET SPINS scatters on the screen trigger 10 SWEET SPINS, with each additional scatter above the minimum 3 required awarding +2 spins. 3 or more SWEET SPINS scatters during SWEET SPINS award a retrigger of 5 more SWEET SPINS, with each additional scatter awarding +2 bonus spins. During FREE SPINS the pinatas are activated by a special Progress Bar. Any multiplier awarded by the pinatas is accumulated and applies to all wins in the remaining FREE SPINS. The multiplier resets at the end of the bonus round.

PROGRESS BAR

During FREE SPINS the pinatas are activated when the player fills a section of the Progress Bar shown under the pinatas.

The Progress Bar is filled by symbols that participate in a win. It has three steps that correspond to the three pinatas.

When a pinata is activated it shows in the middle of the screen and the player has to hit it. When hit, the pinata gives a RANDOM MULTIPLIER. Each next hit increases that multiplier by a random amount. When the pinata is smashed the final multiplier is awarded. If a Pinata is triggered but not manually smashed by the player after two minutes it will automatically award the same multiplier as it would have if the player had smashed it manually.

The Progress Bar resets at the end of the bonus round.

HOW TO PLAY PINATAS & PONIES

Total Stake

The Total Stake is the total of stakes per line. You can adjust it at any time, using the + or – buttons.
Spin the Reels

If you are playing on desktop, click the Spin button or press the spacebar to spin.

Jackpot Game

Win one of the offered jackpot tiers when three or more jackpot symbols appear on the reels or the jackpot is triggered by a game feature. The chances of winning a jackpot increase in correlation with the size of the stake played. The jackpot is triggered randomly and can be won by playing any of the linked jackpot games. To win the jackpot, the player is not required to make any decision other than to spin the reels. The stake value cannot be changed during free spins. Internet connectivity issues may cause delays in jackpot messages or updates, but they do not affect actual jackpot wins. It is not possible for two players to win the same jackpot. In the event two jackpot winnings occur close to one another the jackpot will be assigned in their respective order. Due to connectivity issues the jackpot value displayed may differ from the effective jackpot value. The jackpot could be temporary deactivated, when this occurs all contributions are paused. The jackpot amount available upon reactivation will be the same as before the deactivation.

The rules for Jackpot discontinuation and Jackpot fund allocation are defined by each Operator at their own discretion.

Progressive Jackpot

The progressive jackpot is accumulated by all stakes on games offering these jackpots and, in some cases, the jackpots may be offered on multiple websites. A percentage of each total bet is added to a common pot. Part of this contribution is used to form the progressively increasing jackpot amounts, and the other part, contributes to a seed fund, which is the minimum amount of money guaranteed to be made available to players after a jackpot is won by qualifying players. Once the jackpot has been won, a new progressive jackpot will be made available and the process repeats. The jackpot can be triggered and won by a single spin from a single user only. The jackpot does not have a ceiling value. The odds of winning the jackpot increases with the size of the jackpot and can be won at any time. When the jackpot is won by another player, a notification appears in the jackpot panel. Once won, the amount is transferred directly to the user wallet, even if it is won during a bonus spin.

General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

The prize value from one payline is equal to the total stake divided by the number of paylines, multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

Example: Total stake is 2. Total paylines are 20. Symbol multiplier for length of 5 is 300. The win for 1 payline with this symbol and length would be calculated as such: $2 / 20 * 300 = 30$.

The prize value from one payline in a Multiline game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid.

Example: Stake is 2. Symbol multiplier for length of 5 is 20. The win for 1 payline with this symbol

and length would be calculated as such: $2 * 20 = 40$.

The prize value from one way or cluster in a Ways or Winning Clusters game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed.

If more than one win occurs on the same way or cluster, the largest win is paid.

Example: Total stake = 2. Symbol win multiplier = 2. Win = $2 \times 2 = 4$.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.
