

HOW TO CALCULATE WAYS WIN

- There are 4608 ways to win in this game. Landing an identical symbol on 3,4 or 5 consecutive reels from the left awards a win except for wilds where 2 consecutive symbols triggers a win.
- Only the highest win is paid per symbol and that wins must begin with the leftmost reel.
- If any of the reels contain more than 1 instance of the winning symbol, the win is multiplied. For example, if the first reel contain 2 winning symbols, the second reel 3 winning symbols and the third reel 2 winning symbols, this win is treated like a 3-of-a-kind win with a $2*3*2=12x$ MULTIPLIER.
- Each symbol's payout is listed in the paytable.
- All wins are multiplied by the total Base Bet amount.
- Way wins are summed together after the spin.

CASH FALLS FEATURE

If every position on a reel is filled with coins, the Cash Falls feature is triggered. This awards the total prize value of all coins on that reel. When coins land, all coins on that reel are held for the next 3 spins. The number of remaining spins coins are held for is displayed at the bottom of the reel. The counter is reduced by one for every consecutive spin where no coins land. After Cash Falls has been triggered, the coins currently on that reel are no longer held.

ADD 'EM UP

When ADD 'EM UP lands on a reel, it will collect the values of all other coins on the reel except the JACKPOT WHEEL COIN. If multiple ADD 'EM UP land on a reel on a single spin, they will be evaluated one at a time top to bottom and will include the value of any previous ADD 'EM UP coin.

JACKPOTS

If a JACKPOT COIN is awarded, then it awards the prize displayed in the jackpot meter.

If JACKPOT WHEEL is awarded, the Jackpot Wheel feature will trigger and award MINI with a 3-20x multiplier, MINOR with a 2-10x multiplier, MEGA, or MAJOR.
