Game Objective

Race Track is a thrilling, fast-paced game with very quick and easy rounds. Choose the horse that you believe has the winning spirit, place the bet, and feel the rush as you wait to see if your racer will cross the finish line first.

You can play it safe by betting on horses with a higher chance of winning or strive for bigger payouts by betting on horses which are less likely to win.

Can't decide? See Tipster's Choice and explore the options. After all, the stakes are high in Race Track!

Game Rules

The aim of the game is to guess the winning horse by placing a bet on it. Each of the six bet spots represents a horse participating in a race, where only one horse wins. Horses are assigned to lanes in descending order of strength (one horse per lane), with the strongest horse in lane one and the weakest in lane six. There are 50 horses* in total, and every race features a lineup of six randomly chosen horses. In every race, there are a couple of strong horses (with a high chance of winning), some average ones (with a medium chance of winning) and some outsiders (with a low chance of winning).

Please note that the winning odds and payouts for bet spots change from race to race.

*Disclaimer: The names of the horses in Race Track are fictional, and any resemblance to real-life horses is purely coincidental.

Game Results

Your winnings for each game are calculated based on the winning horse's payout. The bets on the rest of the horses are lost.

Payouts

Each horse has a different payout. Your payout depends on the winning horse's payout.

The CHIP DISPLAY allows you to select the value of each chip you wish to bet. Only chips of denominations that can be covered by your current balance will be enabled.

Once you have selected a chip, place your bet by simply clicking/tapping the appropriate bet spot on the game table. Each time you click/tap the bet spot, the amount of your bet increases by the value of the selected chip or up to the maximum limit for the type of bet you have selected. Once you have bet the maximum limit, no additional funds will be accepted for that bet, and a message will appear above your bet to notify you that you have bet the maximum.

NOTE: Please do not minimise your browser or open any other tab in your browser while betting time remains and you have placed bets on the table. Such actions may be interpreted as leaving the game, and your bets will therefore be declined for that particular game round.

The REPEAT button allows you to repeat all bets from the previous game round. This button is available only before the first chip is placed.

⟳ REPEAT

The DOUBLE (x2) button becomes available after you have placed any bet. Each click/tap doubles all your bets up to the maximum limit. Note that you must have a sufficient account balance to double ALL your placed bets.

Error Handling

If there is an error in the game, system or game procedure, the game round will be temporarily paused while the game host notifies the service manager. You and other players will be notified via Chat, or by an on-screen pop-up message, that the issue is being investigated. If the manager can immediately resolve the error, the game round will continue as normal. If immediate resolution is not possible, the game round will be cancelled, and the initial bets will be refunded to all the players who participated in the game round.

Disconnection Policy

If you are disconnected from a game round, any placed bets remain valid and are settled in your absence. Upon reconnecting, you can view the bet outcomes in the History window.

Players' messages in Chat are subject to automated decision-making. In cases of misuse, such as the abuse of the game host or other players or inappropriate and/or offensive language, the player will be issued a warning. Multi-Game Play

If you enjoy non-stop action, you can join more than one game table — then view and play them simultaneously, all in the same browser window!

After you have joined at least one game table, click on LOBBY. In the lobby or game, click the +TABLE button associated with that table to join it. Certain tables may be unavailable for multi-game play and will therefore not display a +TABLE button.

+ TABLE

After you have joined multiple tables, you will be able to resize your browser window as a whole, but you will not be able to resize each game table window separately.

You can exit any table without affecting your presence at other tables you have joined. To exit a table, click the X button.

Please note:
- You will automatically exit a table if you join the same table through a different device/browser.
- If you click directly on a table icon instead of the +TABLE button, you will merely *switch* tables instead of joining the chosen table *in addition* to the table you joined previously.

We kindly advise you to join only as many tables as your screen can accommodate while still allowing you to place bets deliberately and accurately.
