

# **SPECIAL SYMBOLS AND FEATURES**

## **MEGAWAYS™**

The number of possible win ways varies per spin according to the total number of individual symbols which land on the reels, with a maximum potential of 117,649 MegaWays™ to win!

## **CHAIN REACTION**

Symbols forming wins disappear, making way for new symbols to drop in that may form new wins.

## **WILD REELS & EYE OF HORUS SCATTER**

Each of the middle reels has 4 lights above it. Landing an Eye of Horus scatter on a certain reel activates one of the lights above the same reel. When all 4 lights of a reel are lit up, that same reel is covered with a SUPER WILD.

The SUPER WILD stays locked until all 4 lights above the reel deactivate. The lights deactivate one by one each time the SUPER WILD participates in a win way and they also deactivate after a spin has been made.

The middle 2 reels begin with their first 2 lights already activated but after spawning a Super Wild on those reels the lights still gradually deactivate until all 4 are out as described above.

## **SUPER WILD**

The SUPER WILD appears on a reel only after activating all lights above the same reel. The SUPER WILD covers an entire reel and has a ways multiplier of between x2 and x7. The WAYS MULTIPLIER represents how many symbols the SUPER WILD is being counted as in the ways calculation.

WILDS substitute for all paying symbols and count as the symbol which forms the longest winning combination on a single win way.

## **FREE SPINS**

Landing 3 FREE SPINS scatters anywhere triggers FREE SPINS. At the start of the bonus round you must choose 1 of 3 bonus round variations:

12 FREE SPINS with 1 SUPER WILD

8 FREE SPINS with 2 SUPER WILDS

3 FREE SPINS with 3 SUPER WILDS

Pressing on your chosen variation starts the bonus round and the respective modifiers are applied to it.

During FREE SPINS the chosen number of SUPER WILDS are always present on the slot, but they move at random between the middle 4 reels. A SUPER WILD may also stay in the same position between spins. At the start of a spin all SUPER WILDS on the reels receive a new random WAYS MULTIPLIER between 2x and 7x.

When participating in a win the SUPER WILDS are destroyed but are spawned again at the start of the next spin.

FREE SPINS scatters do not land during the bonus round and no retriggers are possible.

The FREE SPINS bonus round starts with a x1 WIN MULTIPLIER and each win increases it by +1 up to a maximum of x15. The multiplier is applied to all wins during the bonus round. The WIN MULTIPLIER resets at the end of FREE SPINS.

Upon exiting the bonus round you continue from the same progress level you achieved before entering the bonus round.

## BONUS AUTO-COMPLETE

This game has no best strategy. If the player loses connection to the game, closes the game or restarts the game before making a choice when FREE SPINS are triggered, the bonus will auto-complete by choosing one of the FREE SPINS variations at random.

### General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

The prize value from one payline is equal to the total stake divided by the number of paylines, multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

Example: Total stake is 2. Total paylines are 20. Symbol multiplier for length of 5 is 300. The win for 1 payline with this symbol and length would be calculated as such:  $2 / 20 * 300 = 30$ .

The prize value from one payline in a Multiline game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid.

Example: Stake is 2. Symbol multiplier for length of 5 is 20. The win for 1 payline with this symbol and length would be calculated as such:  $2 * 20 = 40$ .

The prize value from one way or cluster in a Ways or Winning Clusters game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed.

If more than one win occurs on the same way or cluster, the largest win is paid.

Example: Total stake = 2. Symbol win multiplier = 2. Win =  $2 \times 2 = 4$ .

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.

Please be aware that each account allows only a single game to be played at any one time.

Therefore, a game should not be played on more than one device, or multiple games on the same device simultaneously. Doing so may lead to various errors.

In case of an incomplete game round due to connection loss where the result has not yet occurred, the game will generate an outcome for the round, which will be shown upon restoring of connection and the result will be visible in the Game History after refreshing the game.
