

SPECIAL SYMBOLS & FEATURES

WILD GIRLS

The Wild girl symbols land with a size of 1x1 in normal game and 1x3 in Free spins. Wilds substitute for all paying symbols and count as the symbol which forms the highest paying combination on a single win line.

LUCKY CHEST

Lucky chests are scatter symbols that may land anywhere. One chest may appear on a single reel, for a possibility of up to 5 chests in a single spin. When they land they need to be opened by pressing the "Collect" sign on them in order to award a feature. Lucky chests may award any of the following features:

Instant Win - each chest may award a stake multiplier award based on the current stake. The possible stake multipliers that may be awarded are:

5x, 6x, 8x, 10x, 12, 15x, 16x, 18x, 20x, 25x, 30x, 38x, 50x, 60x, 80x, 100x, 150x, 300x.

Lucky Respin - each chest may trigger one respin during which all any unopened chest will be held on their positions.

Random tiles - each chest may throw a random amount of same type symbols on the reels, except Wild, 10 and J. A minimum of 6 symbols is guaranteed at the end of the feature.

Swap reels - if exactly 3 Lucky chest have landed in a spin any of the them may trigger the Swap reels feature, during which the remaining 2 reels that have no chests on them will be swapped.

If after an activation of a chest a win is formed, that win will be paid out immediately and after that any remaining unopened chests will be made available for interaction.

FREE SPINS

Triggered by 3 FREE SPINS scatters on reels 1, 3 & 5. When the bonus round is triggered the Free spins scatters move to the middle of the screen and become picker options. After one of the picker options is interacted with it reveals the amount of free spins to be played during the bonus round. The possible amounts are 8, 9, 10, 12, 15, 18 or 20 free spins.

During Free spins the Wild girls become 1x3 in size and the chance of them landing is increased. If a Wild lands partially it will nudge to appear fully on the screen.

HOW TO PLAY WILD WILD CHEST

Total Stake

The Total Stake is the total of stakes per line. You can adjust it at any time, using the + or – buttons.

Spin the Reels

If you are playing on desktop, click the Spin button or press the spacebar to spin.

Jackpot Game

Win one of the offered jackpot tiers when three or more jackpot symbols appear on the reels or the jackpot is triggered by a game feature. The chances of winning a jackpot increase in correlation with the size of the stake played. Jackpot prizes are not affected by any game features e.g. multipliers are never applied to jackpots. The jackpot is triggered randomly and can be won by playing any of the linked jackpot games. To win the jackpot, the player is not required to make any decision other than to spin the reels. The stake value cannot be changed during free spins. Internet connectivity issues may cause delays in jackpot messages or updates, but they do not affect actual jackpot wins. It is not possible for two players to win the same jackpot. In the event two jackpot winnings occur close to one another the jackpot will be assigned in their respective order. Due to connectivity issues the jackpot value displayed may differ from the effective jackpot value. The jackpot could be temporary deactivated, when this occurs all contributions are paused. The jackpot amount available upon reactivation will be the same as before the deactivation.

The rules for Jackpot discontinuation and Jackpot fund allocation are defined by each Operator at their own discretion.

Progressive Jackpot

The progressive jackpot is accumulated by all stakes on games offering these jackpots and, in some cases, the jackpots may be offered on multiple websites. A percentage of each total bet is added to a common pot. Part of this contribution is used to form the progressively increasing jackpot amounts, and the other part, contributes to a seed fund, which is the minimum amount of money guaranteed to be made available to players after a jackpot is won by qualifying players. Once the jackpot has been won, a new progressive jackpot will be made available and the process repeats. The jackpot can be triggered and won by a single spin from a single user only. The jackpot does not have a ceiling value. The odds of winning the jackpot increases with the size of the jackpot and can be won at any time. When the jackpot is won by another player, a notification appears in the jackpot panel. Once won, the amount is transferred directly to the user wallet, even if it is won during a bonus spin.

General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

Winning combinations and payouts are made according to the Paytable.

If you are playing a Lines game, the prize value from one payline is equal to the total stake multiplied by the symbol multiplier advertised in the Paytable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

If you are playing a Ways or a Cluster game, the prize value from one way or winning cluster is equal to the payout advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed. If more than one win occurs on the same way or cluster, the largest win is paid.

During the Free Spins bonus rounds, the game uses a different set of reel strips.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.

Please be aware that each account allows only a single game to be played at any one time. Therefore, a game should not be played on more than one device, or multiple games on the same device simultaneously. Doing so may lead to various errors.
