

SPECIAL SYMBOLS AND FEATURES

SHIELD & WREATH

Each spin is numbered from 1 to 10, indicated by a counter above the slot scene. Golden Shields may appear on every spin and will leave behind a Golden Wreath if they do. Golden Wreaths stay locked on their position until the 10th spin. The Golden Shield symbol is a scatter.

If a Golden Shield lands on a wreath it will duplicate it on another random tile position that does not already have a wreath on it. On every 10th spin all Golden Wreaths will turn into WILD symbols.

TROY SPINS

3 or more TROY SPINS scatters anywhere on the reels trigger TROY SPINS. TROY SPINS scatters do not appear during the 10th spin.

Golden Shields and Golden Wreaths do not appear during TROY SPINS. Instead, a number of WILDS are always present on the reels and they change their position on each FREE SPIN. Sometimes WILDS may remain on the same position after a spin.

At the start of the bonus round a wheel must be spun to decide how many FREE SPINS with how many WILD symbols ever present on the reels will be awarded.

The maximum number of FREE SPINS and the maximum number of WILDS which may be awarded by the wheel is determined by how many TROY SPINS scatters have triggered the bonus round and are as follows:

3x scatters - maximum 15 spins and maximum 10 WILDS may be won from the wheel;

4x scatters - maximum 25 spins and maximum 12 WILDS may be won from the wheel;

5x scatters - maximum 50 spins and maximum 15 WILDS may be won from the wheel;

Each TROY SPINS scatter that lands during the bonus round awards an additional FREE SPIN.

HOW TO PLAY GODS OF TROY

GAME PROGRESS

Any progress features in the game, including symbols locked onto the reels which affect subsequent spins, are saved for your game at the stake level you are playing at.

You can have different progress levels at different stakes on the same game, and move between them by changing the stake.

If you are awarded free spins from a promotional campaign any progress in the main game including any locked symbols, will be saved and be available to continue playing at the same stake once the free spins have been completed.

Please note that this stateful game saves its state forever.

Gamble Wheel

After a spin which results in a win of more than 0.10 EUR, the "Gamble" button is activated and the player may enter the Gamble game for a chance to increase their win.

The Gamble Wheel offers the player true odds and always plays 100% randomly with 100% RTP. The player can configure the Gamble using the following options:

Pressing the plus button increases the potential win on the ladder and recalculates the wheel's chances. Pressing the minus button decreases the potential win. The green section of the wheel displays the exact chance of winning. The red section displays the exact chance of losing. If the player commits to pressing the Gamble button, the pointer within the wheel will spin. If the pointer lands in the green area, the player wins the highlighted prize which they chose in advance. If the pointer lands on the red area the Gamble is over and the player returns to the slot game.

The player doesn't have to collect the winnings manually. They are auto-collected after every Gamble round. Press the "Collect" button to collect your winnings and return to the slot game. If the Gamble feature is closed, the player cannot return to the feature unless they win another round in the slot game. The Gamble feature is disabled during auto-play. Jackpot winnings cannot be gambled.

General types of games

Check the pays menu in the game paytable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

Winning combinations and payouts are made according to the Paytable. If you are playing a Lines game, the prize value from one payline is equal to the total stake multiplied by the symbol multiplier advertised in the Paytable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin. If you are playing a Ways or a Cluster

game, the prize value from one way or winning cluster is equal to the payout advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

Please be aware that each account allows only a single game to be played at any one time. Therefore, a game should not be played on more than one device, or multiple games on the same device simultaneously. Doing so may lead to various errors.

For the best gaming experience, use of the latest version of software is recommended. Malfunction voids all pays and plays.
