

SPECIAL SYMBOLS AND FEATURES

ONE-REEL SLOT

The slot is 1x3 and the top and bottom symbols will be only partially visible.

BONUS WHEEL

The bonus is triggered when the Bonus Wheel symbol lands on the middle position of the reel. The wheel has 8 segments - 4 losing segments, 3 segments with small prizes and 1 segment with a big prize.

In the first Bonus Wheel spin, the segments that offer a reward are visibly larger in size for a 75% chance of a win. Subsequent wheel spins show smaller winning segments that offer a 50% chance of a win.

If the Bonus Wheel pointer comes to rest on a prize segment, all prizes are increased and the player is given the choice to COLLECT the currently won prize or GAMBLE it on the wheel. When the pointer stops on a big prize segment this increases the prizes by a larger amount than when it stops on a small prize segment. When it stops on a losing segment this ends the bonus and the currently won prize (if any) is lost. The player can gamble up to 3 times. The minimum multiplier offered by the wheel is 15x and the maximum is 5000x. The maximum multiplier is achievable only if the pointer stops on golden segments on each wheel spin.

NUDGE

Sometimes if the Bonus Wheel symbol doesn't land in the middle, the reel may nudge itself to make it happen.

BEST GAMBLE STRATEGY

The Best Gamble Strategy is to GAMBLE twice and then COLLECT.

HOW TO PLAY VIRAL SPIRAL

Game Progress

Any progress features in the game, including symbols locked onto the reels which affect subsequent spins, are saved for your game at the stake level you are playing at.

You can have different progress levels at different stakes on the same game, and move between them by changing the stake.

If you are awarded free spins from a promotional campaign any progress in the main game including any locked symbols, will be saved and be available to continue playing at the same stake once the free spins have been completed.

Please note that this stateful game saves its state forever.

Total Stake

The Total Stake is the total of stakes per line. You can adjust it at any time, using the + or – buttons.

Spin the Reels

If you are playing on desktop, click the Spin button or press the spacebar to spin.

Autoplay

Press the AUTO button to commence automatic play of the game at the currently selected stake. Select how many spins to play via the Total Spins Dropdown menu.

More Autoplay settings

Select the loss limit: The Autoplay will stop at the last spin before the loss limit is reached. The Autoplay loss limit should be higher than your stake.

Expand the AUTOPLAY dialog by choosing MORE AUTOPLAY SETTINGS. Here you can select additional criteria for the AUTOPLAY stop including - Stop if single win exceeds certain amount; Stop on Bonus Feature.

Gamble Wheel

After a spin which results in a win of more than 0.10 EUR, the "Gamble" button is activated and the player may enter the Gamble game for a chance to increase their win.

The Gamble Wheel offers the player true odds and always plays 100% randomly with 100% RTP. The player can configure the Gamble using the following options:

Pressing the plus button increases the potential win on the ladder and recalculates the wheel's chances. Pressing the minus button decreases the potential win. The green section of the wheel displays the exact chance of winning. The red section displays the exact chance of losing. If the player commits to pressing the Gamble button, the pointer within the wheel will spin. If the pointer lands in the green area, the player wins the highlighted prize which they chose in advance. If the pointer lands on the red area the Gamble is over and the player returns to the slot game.

The player doesn't have to collect the winnings manually. They are auto-collected after every Gamble round. Press the "Collect" button to collect your winnings and return to the slot game. If the Gamble feature is closed, the player cannot return to the feature unless they win another round in the slot game. The Gamble feature is disabled during auto-play. Jackpot winnings cannot be gambled.

Auto finish

This game saves its state for 5 calendar days from the date of the last action taken. If the game remains uncompleted after 5 days, the Auto Complete function will complete the game by utilizing the Best Strategy for the game. Any winnings will be automatically added to the user balance.

General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

The prize value from one payline is equal to the total stake divided by the number of paylines, multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

Example: Total stake is 2. Total paylines are 20. Symbol multiplier for length of 5 is 300. The win for 1 payline with this symbol and length would be calculated as such: $2 / 20 * 300 = 30$.

The prize value from one payline in a Multiline game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid.

Example: Stake is 2. Symbol multiplier for length of 5 is 20. The win for 1 payline with this symbol and length would be calculated as such: $2 * 20 = 40$.

The prize value from one way or cluster in a Ways or Winning Clusters game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed.

Example: Total stake = 2. Symbol win multiplier = 2. Win = $2 * 2 = 4$.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.

Please be aware that each account allows only a single game to be played at any one time. Therefore, a game should not be played on more than one device, or multiple games on the same device simultaneously. Doing so may lead to various errors.

In case of an incomplete game round due to connection loss where the result has not yet occurred, the game will generate an outcome for the round, which will be shown upon restoring of connection and the result will be visible in the Game History after refreshing the game.

In case of an incomplete game round due to connection loss where the result has occurred, but the player could not be informed of this fact, the game will inform the player of the outcome upon refreshing of the game and the result will be visible in the Game History.
