

Sharks of the Caribbean 2

Game Rules

Sharks of the Caribbean 2 is a 20 payline, 3 X 5 video slot game. Game features include SHARK SPINS freespins triggered by 3 or more SHARK SPINS scatter symbols and the CASH CRAB feature triggered by 3 or more cash crab scatter symbols.

Simultaneous or coinciding wins on different pay lines are added.

Winning combinations start from the leftmost reel and the symbols have to be consecutive along a payline, except scatter symbols which pays for 3 or more anywhere in view.

Wilds substitute for all symbols except SHARK SPINS and CASH CRAB scatter symbols.

Only highest win paid per line.

Payouts have been multiplied by the current active base bet.

Malfunction voids pays and plays.

About The Game

SHARK SPINS FEATURE

3 or more SHARK SPINS symbols anywhere in view starts the SHARK SPINS feature.

At the start of the feature the player is awarded 10 free spins and a small bonus win of:

2x the total stake for 3 of a kind entry, or

10x the total stake for 4 of a kind entry, or

20x the total stake for 5 of a kind entry.

Starting at x1, after each spin the multiplier increases by 1 to a maximum of x30.

3 or more SHARK SPINS symbols in view during SHARK SPINS awards an extra 10 free spins.

CASH CRAB FEATURE

3 or more CASH CRAB symbols anywhere in view starts the CASH CRAB feature.

Select one of the available crabs.

The crab will open to reveal a cash value.

The values of the prizes are dependent on the number of CASH CRAB symbols that awarded the feature.

Please note only one of the two features can be triggered in the same game.

BONUS BOOST

Selecting Bonus Boost places a side bet equal to the current active bet. When BONUS BOOST is active it increases the number of BONUS symbols on the reels, for a much higher Free Spins Bonus frequency.

Bonus Boost is only active in the base game and is not active during Free Spins. With Bonus Boost active all wins remain multiples of the current base bet.

HOW TO CALCULATE PAYLINE WINS

To calculate your total payline win, calculate all payline wins and add them together.

To calculate a single payline win, count the number of identical symbols lined up in sequence on the line.

If three or more identical symbols are lined up, find the win value in the dynamic Pay Table. There you can find the value for all symbols for 3 in a row, 4 in a row and 5 in a row. Only the highest winning combination per line is paid out.

If the winning combination starts with three wilds, there can be many ways to interpret the win. In this scenario, only the highest win combination is paid out.

After the Bonus round is completed, all wins are added to any win from the game that activated the Bonus.

There can be a discrepancy between sum of the individual wins in Free Spins from what is displayed in the total win end screen. The total win end screen displays the final rounded win.

GAME OPTIONS

Click the options icon to expand or collapse the options tray.

Pay Table – Find how much each symbol pays out, explanations of the game features, and information on the paylines.

Game Settings – Change Sounds on/off, and access the Game Rules.

Game History – If this feature is enabled on your gaming website, you may review and replay your last 10 game rounds.

Game Rules – Opens the rules of the game.

GAME PANEL

Paylines Active – Displays the number of paylines.

Stake – Displays the current bet and accesses panel to change bet.

Spin Button – Places the bet and spins the reels. When the reels are spinning, the spin button transforms into the Stop Button. Pressing the Stop Button stops the reels immediately.

Autoplay (If Available) – Allows the player to access the Autoplay panel to select amount of autoplays and limits.

Winnings – Displays the win for the current or last win payout step.

Credit – Displays the player's account balance.

AUTOPLAY (If Available)

Autoplay automatically plays the game for the selected number of spins.

The player can enable autoplay by pressing the AUTOPLAY button on the main screen, configuring settings, and then starting autoplay.

In the autoplay settings, the player can select the number of spins for autoplay and specify whether to stop autoplay when a single win limit is reached.

The player must also set the Loss Limit value for the autoplay to function. It will not work without this.

When activated, the number of spins remaining for autoplay is displayed. The player has the option to stop autoplay and continue with normal play.

ADDITIONAL INFORMATION

Players cannot be unfairly advantaged or disadvantaged by disconnections or network interruptions.

In rare and exceptional circumstances where a game state cannot be restored, such a malfunction voids all pays and play.
