

Lucky Twins 5X 4Tune Reels™

About this Game

This game includes up to 4 slot games that can be played simultaneously.

Each slot game has 5 reels and 3 rows.

Each slot game includes 9 fixed paylines.

Each slot game is numbered.

You can select the number of slot games you want to play simultaneously in the base game only.

The deselected slot games still simulate play. No payouts apply for any winning combinations formed.

The objective of the game is to spin the reels so the symbols land in different combinations.

General Bet and Payout Rules

The number of credits bet per payline is your total bet per spin divided by the number of paylines.

The total bet amount is distributed equally across the selected slot games.

The total bet scales with the number of slot games selected.

All paylines are permanently enabled for every spin.

All paytables display the payout for each symbol combination based on your current bet.

All payouts are based on your bet per payline.

Only one regular winning combination is paid out per payline and you are paid out the value of the highest win.

Only one scatter winning combination is paid out per spin and you are paid out the value of the highest win.

Scatter and bonus wins are added to regular wins.

If you have a winning combination, the win is highlighted on the reels. If you do not have a winning combination, the game is over and you can play again.

Regular symbols

Regular symbols are all symbols on the reels that do not have a bonus feature but complete regular winning combinations on an enabled payline.

Matching regular symbols must be next to each other on an enabled payline.

Regular winning combinations pay out from left-to-right, starting from the first slot reel.

Regular payouts depend on your bet per payline.
