

SPECIAL SYMBOLS AND FEATURES

CHAIN REACTION

Symbols forming wins disappear, making way for new symbols to drop in that may form new wins.

CLUSTERBUSTER™

An inactive cluster of locked tiles, 3x3 in size, is present on the reels. The outer tiles of the inactive cluster unlock when winning clusters are formed adjacent to it. Break all outer tiles to bust open the cluster and reveal its prize. The broken parts of the inactive cluster reset at the start of each spin.

ANCIENT ORBS PROGRESS

Each game feature is represented by a coloured orb above the reels. All orbs except the green one are locked at the start of the game. Release the scarab encased in the 3x3 Clusterbuster in the middle of the reels to unlock the next feature in line.

When a feature is unlocked it is triggered in the next spin. During that spin a new feature cannot be unlocked and at the end of it the next scarab is encased in the Clusterbuster ready to be released in the same way. All unlocked features may trigger randomly in future spins. More than 1 feature may trigger in the same spin if there is more than 1 feature unlocked. Unlocked features trigger at the start of a spin.

The order to unlock the orbs is:

Blue > Red > Purple.

After these orbs are unlocked the FREE SPINS SCARAB is encased in the Clusterbuster and will not be replaced after it activates. The FREE SPINS SCARAB awards 10 FREE SPINS every time it is released.

ANCIENT ORBS

Green Orb

The game starts with the Green Orb already unlocked. When this feature triggers, any of the paying symbols may land as a 3x3 SUPER SYMBOL. All SUPER SYMBOLS that land will be of the same type. Up to 3 SUPER SYMBOLS may land in a spin.

Blue Orb

When this feature is triggered up to 3 BLUE SUPER WILDS, 3x3 in size, will land in the spin.

Red Orb

When this feature is triggered a red 3x3 SUPER WILD will land in the spin. After participating in a win the red 3x3 SUPER WILD will turn into 9 scarabs. The scarabs fly over the reels and land on random positions as WILD symbols.

Purple Orb

When this feature is triggered a red 3x3 SUPER WILD holding a win MULTIPLIER will land in the spin. After participating in a win this red 3x3 MULTIPLIER SUPER WILD will turn into 9 scarabs. The scarabs fly over the reels and land on random positions as WILD symbols holding the same win MULTIPLIER as the SUPER WILD. The MULTIPLIER is applied to all wins in which the WILD symbols participate.

The possible MULTIPLIERS are:

x2, x3, x5 and x10

If more than one WILD symbol with a MULTIPLIER participate in the same winning cluster, their values are added up.

FREE SPINS

Triggered every time the FREE SPINS SCARAB is released and awards 10 FREE SPINS. The Clusterbuster is not present on the reels during the bonus round and no retriggers of FREE SPINS are available.

During FREE SPINS there is an increased chance of triggering one or more of the coloured orb features.

At the end of FREE SPINS the FREE SPINS SCARAB is enclosed again and may be released in future spins to trigger more FREE SPINS.

HOW TO PLAY EGYPT CLUSTERBUSTER™

Game Progress

Any progress features in the game, including symbols locked onto the reels which affect subsequent spins, are saved for your game at the stake level you are playing at.

You can have different progress levels at different stakes on the same game, and move between them by changing the stake.

If you are awarded free spins from a promotional campaign any progress in the main game including any locked symbols, will be saved and be available to continue playing at the same stake once the free spins have been completed.

Please note that this stateful game saves its state forever.

Jackpot Game

Win one of the offered jackpot tiers when three or more jackpot symbols appear on the reels or the jackpot is triggered by a game feature. The chances of winning a jackpot increase in correlation with the size of the stake played. Jackpot prizes are not affected by any game features e.g. multipliers are never applied to jackpots. The jackpot is triggered randomly and can be won by playing any of the linked jackpot games. To win the jackpot, the player is not required to make any decision other than to spin the reels. The stake value cannot be changed during free spins. Internet connectivity issues may cause delays in jackpot messages or updates, but they do not affect actual jackpot wins. It is not possible for two players to win the same jackpot. In the event two jackpot winnings occur close to one another the jackpot will be assigned in their respective order. Due to connectivity issues the jackpot value displayed may differ from the effective jackpot value. The jackpot could be temporary deactivated, when this occurs all contributions are paused. The jackpot amount available upon reactivation will be the same as before the deactivation.

The rules for Jackpot discontinuation and Jackpot fund allocation are defined by each Operator at their own discretion.

Progressive Jackpot

The progressive jackpot is accumulated by all stakes on games offering these jackpots and, in some cases, the jackpots may be offered on multiple websites. A percentage of each total bet is added to a common pot. Part of this contribution is used to form the progressively increasing jackpot amounts, and the other part, contributes to a seed fund, which is the minimum amount of money guaranteed to be made available to players after a jackpot is won by qualifying players. Once the jackpot has been won, a new progressive jackpot will be made available and the process repeats. The jackpot can be triggered and won by a single spin from a single user only. The jackpot does not have a ceiling value. The odds of winning the jackpot increases with the size of the jackpot and can be won at any time. When the jackpot is won by another player, a notification appears in the jackpot panel. Once won, the amount is transferred directly to the user wallet, even if it is won during a bonus spin.

General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

If you are playing a Lines game, the prize value from one payline is equal to the total stake divided by the number of paylines, multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

Example: Total stake is 2. Total paylines are 20. Symbol multiplier for length of 5 is 300. The win for 1 payline with this symbol and length would be calculated as such: $2 / 20 * 300 = 30$.

If you are playing a Ways, a MegaWays or a Cluster game, the prize value from one way or cluster in a Ways or Winning Clusters game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed.

Example: Total stake = 2. Symbol win multiplier = 2. Win = $2 \times 2 = 4$.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin. If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.

Please be aware that each account allows only a single game to be played at any one time. Therefore, a game should not be played on more than one device, or multiple games on the same device simultaneously. Doing so may lead to various errors.
