Cherry Red Retro Roller™

## About this Game

This game is a 3 reel and 3 row video slot game.

This game includes 5 fixed paylines.

The objective of the game is to spin the reels so the symbols land in different combinations.

## General bet and payout rules

Your bet per payline is your total bet per spin divided by the number of paylines.

All paytables display the payout for each symbol combination based on your current bet.

The in-game paytable can display the payout as a win value or a multiplier value. Multiplier values displayed are rounded down, but payouts can be higher to match the actual win value.

Only one regular winning combination is paid out per payline and you are paid out the value of the highest win.

If you have a winning combination, the win is highlighted on the reels. If you do not have a winning combination, the game is over and you can play again.

## Regular symbols

Regular symbols are all symbols on the reels that do not have a bonus feature but complete regular winning combinations on enabled paylines.

Matching regular symbols must be next to each other on an enabled payline.

Regular winning combinations pay out from left-to-right, starting from the first slot reel.

Regular payouts depend on your bet per payline.

## Wild Symbols

This symbol can substitute for other symbols to complete wins.

If 1 wild symbol completes a winning combination a 2x multiplier is applied to that win.

If 2 wild symbols complete a winning combination a 4x multiplier is applied to that win.

This symbol can create its own winning combination.
