### **CASH SPINS**

Five Cash Scatters anywhere on the reels activate 3 CASH SPINS. During Cash Spins, only scatters can land on the reels and they remain locked on the screen until the end of the feature. When CASH SPINS has finished, the sum of the values on each Cash Scatter is paid out. Once the CASH SPINS feature ends, the Scatter symbols (gathered on the reel set) and their respective winnings are accumulated together and awarded to the player as a total amount.

The prizes on the Cash Scatters represent stake multipliers displayed with a monetary value based on the current stake. The possible multipliers which the prizes may represent are: 1x, 2x, 3x, 5x, 7x, 10x, 15x, 25x, 30x.

Three types of scatters can land during CASH SPINS:

- Cash Scatter - contributes to the total feature win with the value displayed.
- Frenzy Scatter - increases the value of each Cash Scatter on every spin by the amount of the current stake.
- Double Diamond Scatter - doubles the value of a random Cash Scatter on every spin. Can randomly activate twice during a single spin to double the values of two different Cash Scatters.

Frenzy and Double Diamond Scatters only land during CASH SPINS. If both scatters land, the Frenzy Scatter will be applied first and the Double Diamond second.

CASH SPINS ends after 3 consecutive spins without a scatter landing or if the screen is filled with scatters.

### Gamble Wheel

After a spin which results in a win of more than 0.10 GBP, the "Gamble" button is activated and the player may enter the Gamble game for a chance to increase their win.

The Gamble Wheel offers the player true odds and always plays 100% randomly with 100% RTP. The player can configure the Gamble using the following options:

Pressing the plus button increases the potential win on the ladder and recalculates the wheel's chances. Pressing the minus button decreases the potential win. The green section of the wheel displays the exact chance of winning. The red section displays the exact chance of losing. If the player commits to pressing the Gamble button, the pointer within the wheel will spin. If the pointer lands in the green area, the player wins the highlighted prize which they chose in advance. If the pointer lands on the red area the Gamble is over and the player returns to the slot game.

The player doesn't have to collect the winnings manually. They are auto-collected after every Gamble round. Press the "Collect" button to collect your winnings and return to the slot game.

If the Gamble feature is closed, the player cannot return to the feature unless they win another round in the slot game. The Gamble feature is disabled during auto-play. Jackpot winnings cannot be gambled.

### General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

Winning combinations and payouts are made according to the Paytable.

If you are playing a Lines game, the prize value from one payline is equal to the total stake multiplied by the symbol multiplier advertised in the Paytable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

If you are playing a Ways or a Cluster game, the prize value from one way or winning cluster is equal to the payout advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed. If more than one win occurs on the same way or cluster, the largest win is paid. If more than one win occurs on the same way or cluster, the largest win is paid.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.
