

- Milkshake™ XXXtreme is a 6-reel, 6-row video slot with the Scatter Pays mechanic. The game has the Avalanche™ feature, the Milkshake feature with an increasing Multiplier, and the Booster feature with Multiplier and Color Boosters.
- The game is played with scattered combinations of symbols and different bet values.
- **BET** is the amount of cash to bet.
- The bet value is set by tapping the Bet Settings button and selecting the bet.
- **BALANCE** displays the amount of cash available to bet.
- 8 or more of the same symbols appearing anywhere on the reels award a scattered win.
- Winning combinations and payouts are made according to the Paytable.
- Symbol payout values shown in the Paytable are dynamic and change in accordance with the selected bet value.
- Only the highest win per scattered combination is paid.
- Simultaneous scattered wins from combinations of different symbols are added.

## Wild Symbol

- Wild symbols can appear anywhere on the reels and substitute for all symbols.
- Wild symbol substitution pays the highest possible win on a scattered combination according to the Paytable.
- Wild symbols award a win only in combination with other symbols.
- Wild symbols completely filling the reels award the highest possible scattered win according to the Paytable.

## Avalanche™ Feature

- The symbols fall into positions on the reels, instead of spinning.
- A scattered win starts an Avalanche.
- All symbols in winning scattered combinations explode and disappear, leaving space for a second Avalanche of symbols.
- The Avalanches continue until there are no more wins.

## Milkshake Feature

- In the Milkshake feature, one Milkshake is added to the play area at the start of each spin replacing any Milkshakes from the previous spin.
- Each Milkshake added to the play area is randomly assigned one of the four colors (red, green, orange, or blue), a Multiplier ranging from x2 to x100, and a starting number of points ranging from 2 to 12.
- A winning scattered combination of symbols disappearing from the reels increases the number of points in all Milkshakes of the same color as the disappearing symbols by the number of symbols in the combination.
- When the number of points in a Milkshake reaches 20 or more, it disappears from the play area, and two new random Milkshakes are added to the play area up to a maximum of 4. After there are 4 Milkshakes on the play area, each of them that reaches 20 points or more is replaced with a new one, but no additional Milkshakes appear.
- At the end of each spin, the total win from the spin is multiplied by the sum of Multipliers of all Milkshakes that have disappeared from the play area during the spin.

## Booster Feature

- In the Booster feature, a Multiplier Booster or a Color Booster is randomly applied to any Milkshake added to the play area at the start of the spin or after the Avalanche.
- A Multiplier Booster applied to a Milkshake replaces its Multiplier with a Multiplier of a higher value (between x2 and x100).
- A Color Booster applied to a Milkshake replaces it with a Rainbow Milkshake with the same Multiplier and the same number of points.
- Any winning scattered combination of symbols of any color disappearing from the reels increases the number of points in all Rainbow Milkshakes on the play area by the number of symbols in the combination.

## Game Functions

- The table below lists different buttons found in the game and describes their functions.

### Main Game

#### Spin

Tap to start playing at the current bet value.

#### Stop

Tap to skip game round animations where possible.

## **Autoplay**

Tap to choose the number of Autoplay rounds and advanced Autoplay settings.

## **Stop Autoplay**

If Autoplay rounds have been chosen, the remaining number of rounds is displayed on the counter. Tap the counter to stop Autoplay. When the Spin button is visible, the counter is displayed on the Spin button.

## **Bet Settings**

Tap to set the bet value.

## **Sound**

Tap to turn the game sounds on or off.

## **Menu**

Tap to access the game settings and game information.

## **Exit**

Tap to leave the game.

### **Game Settings and Game Information**

## **Paytable**

Tap to view winning combinations and payouts.

## **Game Settings**

Tap to view the game settings menu.

- **Quick spin:** Turns the quick spin option on or off.

## **Game Rules**

Tap to view the game rules.
