

SPECIAL SYMBOLS AND FEATURES

CHAIN REACTION

Symbols forming wins disappear, making way for new symbols to drop in that may form new wins.

FREE SPINS

3 or more Stone Slabs trigger 3 FREE SPINS. Stone Slabs appear on all reels except the middle one.

During the bonus round Gonzita sits on a Golden Throne on the middle reel and no symbols appear on that reel. The Stone Slabs that triggered FREE SPINS are transferred into the bonus round and all other tiles will be destroyed at the start of it.

Only slab symbols may land on the reels during FREE SPINS. Some of these show a stake multiplier prize while others do not. Slabs that do not hold a prize are destroyed making way for new slabs of the same type to land. Each time a Slab holding a prize lands the FREE SPINS counter is reset back to 3.

Initially only Stone Slabs land on the reels. When a reel is filled with Stone Slabs showing stake multiplier prizes, their combined sum is collected on Gonzita's Throne while the slabs are destroyed and only Golden Slabs start landing on that reel.

Similarly, when a reel is filled with Golden Slabs showing stake multiplier prizes their sum is again added to the amount on the throne, the Golden Slabs are destroyed and the same reel starts to cascade only Diamond Slabs.

The FREE SPINS bonus round ends when no slabs of any kind land with a stake multiplier prize for a duration of 3 free spins or when all reels are filled with Diamond Slabs with a stake multiplier prize.

At the end of FREE SPINS the total accumulated stake multiplier shown on the top right is paid out. The symbols available during normal game appear again on the next spin after the bonus round.

STONE SLABS

The Stone Slabs are scatter symbols that may land on all reels except the middle one both during normal game and FREE SPINS.

Landing three Stone Slab symbols during normal game triggers FREE SPINS.

The Stone Slabs may appear with the following stake multiplier prizes:

1x, 2x, 5x, 7x

GOLDEN SLABS

The Golden Slabs are scatter symbols which may land on any reel except the middle one and only during FREE SPINS. Golden Slabs appear on a reel only after that reel has been filled with Stone Slabs showing stake multiplier prizes and those prizes have been collected by Gonzita on her throne.

The Golden Slabs may appear with the following stake multiplier prizes:

10x, 25x, 50x, 75x

DIAMOND SLABS

The Diamond Slabs are scatter symbols which may land on any reel except the middle one and only during FREE SPINS. Diamond Slabs appear on a reel only after that reel has been filled with Golden Slabs showing stake multiplier prizes and those prizes have been collected by Gonzita on her throne.

The Diamond Slabs may appear with the following stake multiplier prizes:

100x, 250x, 500x, 750x

Gamble Wheel

After a spin which results in a win of more than 0.10 EUR, the "Gamble" button is activated and the player may enter the Gamble game for a chance to increase their win.

The Gamble Wheel offers the player true odds and always plays 100% randomly with 100% RTP. The player can configure the Gamble using the following options:

Pressing the plus button increases the potential win on the ladder and recalculates the wheel's chances. Pressing the minus button decreases the potential win. The green section of the wheel displays the exact chance of winning. The red section displays the exact chance of losing. If the player commits to pressing the Gamble button, the pointer within the wheel will spin. If the pointer lands in the green area, the player wins the highlighted prize which they chose in advance. If the pointer lands on the red area the Gamble is over and the player returns to the slot game.

The player doesn't have to collect the winnings manually. They are auto-collected after every Gamble round. Press the "Collect" button to collect your winnings and return to the slot game. If the Gamble feature is closed, the player cannot return to the feature unless they win another round in the slot game. The Gamble feature is disabled during auto-play. Jackpot winnings cannot be gambled.

General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

Winning combinations and payouts are made according to the Paytable. If you are playing a Lines game, the prize value from one payline is equal to the total stake multiplied by the symbol multiplier advertised in the Paytable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin. If you are playing a Ways or a Cluster game, the prize value from one way or winning cluster is equal to the payout advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

Please be aware that each account allows only a single game to be played at any one time. Therefore, a game should not be played on more than one device, or multiple games on the same device simultaneously. Doing so may lead to various errors.

For the best gaming experience, use of the latest version of software is recommended. Malfunction voids all pays and plays.
