

Game Rules

First Person Super Sic Bo is an exciting game of chance played with three regular dice with a face value from 1 to 6. The objective of First Person Super Sic Bo is to predict the outcome of the shake of the three dice.

After placing all your bets, click/tap the PLAY button to launch the dice shaker. As the dice are shaken, a number of bet spots — from zero to several — then have multipliers randomly applied to them before the dice come to rest and the result is shown. If your bet is placed on the bet spot with the applied multiplier, your bet is multiplied accordingly.

You can place many kinds of bets on the First Person Super Sic Bo table, and each type of bet has its own payout. Your bet is returned on top of your winnings.

- Small/Big** — place your bet on the total of the three dice being Small (4–10) or Big (11–17). Wins pay 1:1, but these bets lose to any Triple.
- Even/Odd** — place your bet on the total of the three dice being Odd or Even. Wins pay 1:1, but these bets lose to any Triple.
- Total** — place your bet on any of the 14 betting areas labelled 4–17. Total is the total of the three dice and excludes 3 and 18. You win if the total of the three dice adds up to the Total number on which you placed your bet. Payouts vary depending on the winning total.
- Single** — place your bet on any of the six betting areas labelled ONE, TWO, THREE, FOUR, FIVE and SIX which represent the six face values of a dice.
 - If one of three dice shows the number you bet on, you get paid 1:1.
 - If two of three dice show the number you bet on, you get paid 2:1.
 - If all three dice show the number you bet on, you get paid 3:1.
- Double** — place your bet on any of the six Double-labelled betting areas. To win, two of three dice must show the same number. Wins pay 8:1. Please note that

regardless of whether two or three dice show the same number, the payout remains the same.

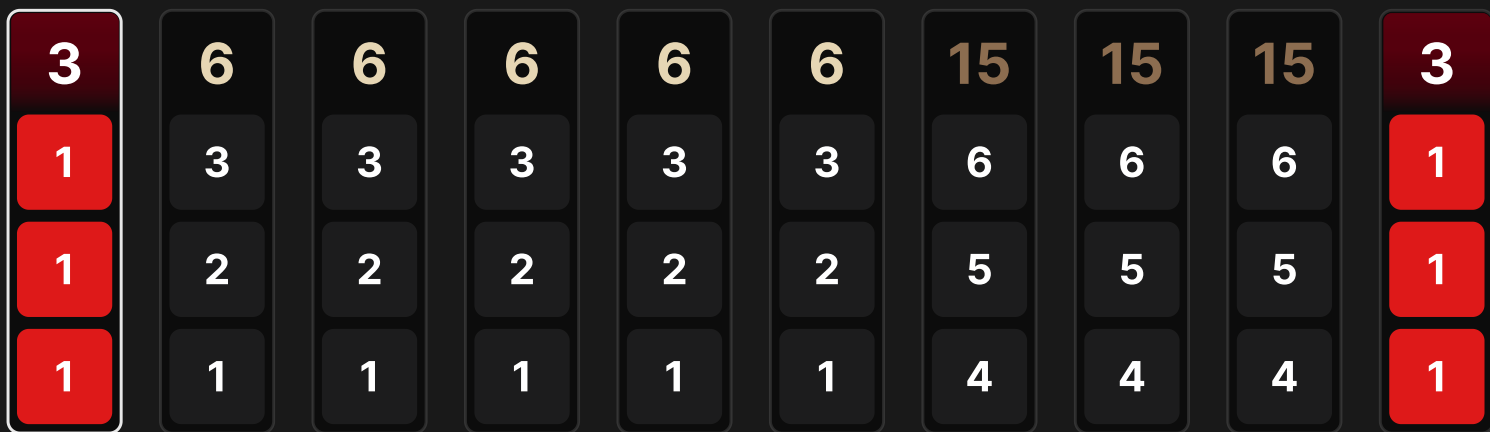

- F. **Triple** — place your bet on any of the six Triple-labelled betting areas. To win, all three dice must match the number chosen, and you get paid 150:1.
- G. **Any Triple** — place your bet on this box to cover all six different Triple bets at once. To win, all three dice must show the same number, and you get paid 30:1.
- H. **Combination** — place your bet on any or all 15 possible two-dice combinations. Wins pay 5:1.

When you finish placing bets and begin the game round, random bet spots will be highlighted, showing the multiplied payouts.

Winning Numbers

The WINNING NUMBERS display shows the most recent winning numbers.

The result of the most recently completed round is listed on the left: the total of the three dice on the upper line, followed by the result of the three individual dice below.

Statistics

In the roadmap below, the winning numbers are displayed in the patterns of Small (S), Big (B), and Triple (T) results. Each cell represents the result of a past round. The result of the earliest round is recorded in the upper left corner. Read the column downwards all the way to the bottom; then start at the top of the adjacent column to the right, and so forth.

This representation may be of help to you in predicting the results of future rounds.

You can change the roadmap display from English to Simplified Chinese or Score Mode by clicking/tapping anywhere on it.

Below the roadmap, you can see the statistics of Small, Big, and Triple bets for the last 50 rounds.
