

## SPECIAL SYMBOLS AND FEATURES

### DYNAMITE WILDS AND GAME PROGRESS

The game features are locked at the start of the game. To unlock them you have to land Dynamite Wild symbols which light the fuse. Dynamite Wilds may land on any reel. Each Dynamite Wild counts for 1 step of game progress.

The game progresses in four stages - one for each of the locked features. At the end of each stage a feature is unlocked and a new round starts. When a feature is unlocked it is triggered in the next spin and triggers randomly in future spins. More than one feature may trigger in the same spin if there is more than one feature unlocked.

Progress breakdown:

- First Stage - 6 Dynamite Wilds required. Unlocks Remove Low-Paying Symbols feature.
- Second Stage - 7 Dynamite Wilds required - 13 in total. Unlocks Random Wilds feature.
- Third Stage - 8 Dynamite Wilds required - 21 in total. Unlocks Multiplier feature.
- Fourth Stage - 9 Dynamite Wilds required - 30 in total. Unlocks Mega Wilds feature.

When a Dynamite Wild lands, it lights the progress fuse and gets removed from the reels, resulting in a lower chance of landing Dynamite Wilds with each step. Once the fourth and final feature is unlocked, Dynamite Wilds will no longer land on the reels.

### REMOVE LOW-PAYING SYMBOLS

When this feature triggers, all low-paying symbols are removed from the reels and only high-paying symbols land for this spin.

### RANDOM WILDS

When this feature triggers, a random number of Wilds will land on the reels.

### MULTIPLIER

When this feature triggers, it adds a Win Multiplier which is applied to the next win that occurs.

If a Multiplier is active before you enter Gold Spins, the Multiplier will be applied to the first win that occurs. If a Multiplier is active at the end of the Free Spins, it will be applied to the next win that occurs in the base game.

## MEGA WILDS

When this feature triggers, it adds one or more Wild Super symbols of 2x2 to 3x3 size on the reels.

## GOLD SPINS

Gold Spins symbols may land on any reel.

3 Gold Spins symbols anywhere on the reels trigger 8 bonus spins. Each additional Gold Spins symbol over the minimum required awards 2 more bonus spins.

Gold Spins symbols may also land during Free Spins. 3 Gold Spins symbols anywhere on the reels during Free Spins trigger 4 additional bonus spins. Each additional Gold Spins symbol over the 3 minimum required awards 1 more bonus spin.

## HOW TO PLAY DYNAMITE RICHES

### Game Progress

Any progress features in the game, including symbols locked onto the reels which affect subsequent spins, are saved for your game at the stake level you are playing at.

You can have different progress levels at different stakes on the same game, and move between them by changing the stake.

If you are awarded free spins from a promotional campaign any progress in the main game including any locked symbols, will be saved and be available to continue playing at the same stake once the free spins have been completed.

Please note that this stateful game saves its state forever.

### Total Stake

The Total Stake is the total of stakes per line. You can adjust it at any time, using the + or – buttons.

### Spin the Reels

If you are playing on desktop, click the Spin button or press the spacebar to spin.

Speed up each reel spin by pressing spacebar again, or by clicking on the reels. For TURBO SPIN, hold down the spacebar or the Spin button.

## Autoplay

Press the AUTO button to commence automatic play of the game at the currently selected stake. Select how many spins to play via the Total Spins Dropdown menu.

## More Autoplay settings

Select the loss limit: The Autoplay will stop at the last spin before the loss limit is reached. The Autoplay loss limit should be higher than your stake.

Expand the AUTOPLAY dialog by choosing MORE AUTOPLAY SETTINGS. Here you can select additional criteria for the AUTOPLAY stop including - Stop if single win exceeds certain amount; Stop on Bonus Feature.

## Gamble Wheel

After a spin which results in a win of more than 0.10 GBP, the "Gamble" button is activated and the player may enter the Gamble game for a chance to increase their win.

The Gamble Wheel offers the player true odds and always plays 100% randomly with 100% RTP. The player can configure the Gamble using the following options:

Pressing the plus button increases the potential win on the ladder and recalculates the wheel's chances. Pressing the minus button decreases the potential win. The green section of the wheel displays the exact chance of winning. The red section displays the exact chance of losing. If the player commits to pressing the Gamble button, the pointer within the wheel will spin. If the pointer lands in the green area, the player wins the highlighted prize which they chose in advance. If the pointer lands on the red area the Gamble is over and the player returns to the slot game.

The player doesn't have to collect the winnings manually. They are auto-collected after every Gamble round. Press the "Collect" button to collect your winnings and return to the slot game.

If the Gamble feature is closed, the player cannot return to the feature unless they win another round in the slot game. The Gamble feature is disabled during auto-play. Jackpot winnings cannot be gambled.

## General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

Winning combinations and payouts are made according to the Paytable.

If you are playing a Lines game, the prize value from one payline is equal to the total stake multiplied by the symbol multiplier advertised in the Paytable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

If you are playing a Ways or a Cluster game, the prize value from one way or winning cluster is equal to the payout advertised in the paytable. Where multiple wins occur on multiple ways or clusters, the total win values are summed. If more than one win occurs on the same way or cluster, the largest win is paid. If more than one win occurs on the same way or cluster, the largest win is paid.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.

Please be aware that each account allows only a single game to be played at any one time. Therefore, a game should not be played on more than one device, or multiple games on the same device simultaneously. Doing so may lead to various errors.

In case of an incomplete game round due to connection loss where the result has not yet occurred, the game will generate an outcome for the round, which will be shown upon restoring of connection and the result will be visible in the Game History after refreshing the game.

In case of an incomplete game round due to connection loss where the result has occurred, but the player could not be informed of this fact, the game will inform the player of the outcome upon refreshing of the game and the result will be visible in the Game History.
