SPECIAL SYMBOLS AND FEATURES

MEGAWAYS™

The number of possible win ways varies per spin according to the total number of individual symbols which land on the reels, with a maximum potential of 117,649 MegaWays™ to win!

AVALANCHE™

Symbols forming wins disappear, making way for new symbols to drop in that may form new wins.

WISH MASTER FEATURES

A Scatter symbol appearing anywhere on the reels randomly activates one of the Wish Master Features for 5 spins:

Extra Wild: All symbols corresponding to the symbol shown in the inventory are replaced by Wild symbols.

Wild Reel: The entire reel on which the Scatter symbol landed is filled with Wild symbols.

Multiplier: All bet way wins are multiplied by either a x2 or x3 multiplier. Both multipliers can be activated simultaneously, multiplying all bet way wins by x6.

Random Wild: 2 to 5 Random Wilds randomly appear on the reels after each spin, overlaying any symbols on the reels.

When a Wish Master Feature is activated, the spin counter is set for 5 spins.

Each activated Wish Master Feature is added to the inventory.

A Scatter symbol appearing on the reels when the Wish Master Features are activated randomly activates another Wish Master Feature and resets the spin counter to 5 spins.

A maximum of 3 Wish Master Features can be activated at the same time. If a Scatter symbol appears on the reels while 3 Wish Master Features are already activated, the Wish Master Feature that was activated first is replaced with a new Wish Master Feature.

The inventory cannot contain identical features. The features are two multipliers - x2, x3, two Extra Wilds - for each of the highest paying symbols, Random Wilds and Wild Reels.

If any Wish Master Feature is activated and two or more Scatter symbols appear on the reels during the same spin, each Scatter symbol starting from leftmost activates a Wish Master Feature, with the first Scatter symbol resetting the spin counter to 5 spins.

Only one Scatter can appear on each reel.

If the spin counter reaches 0 and no Wish Master Feature is activated during that spin, any activated Wish Master Features are removed from the inventory.

If the bet level is changed when the Wish Master features are activated, the spin counter is reset to 0, and any Wish Master features are removed from the inventory. The progress per bet level is saved.

All spins made while the Wish Master Features are active, are paid spins.

WILD SYMBOL

The Wild symbol can appear anywhere on the reels and substitutes for all other symbols except for the scatter.

The Wild symbol substitution pays the highest possible winning combination according to the paytable.

In case a win way only consists of Wild symbols, only the advertised payment for the length of 6x Wild in a win way will be paid out for that way.

HOW TO PLAY THE WISH MASTER MEGAWAYS™

- Game Progress

Any progress features in the game, including symbols locked onto the reels which affect subsequent spins, are saved for your game at the stake level you are playing at.

You can have different progress levels at different stakes on the same game, and move between them by changing the stake.

If you are awarded free spins from a promotional campaign any progress in the main game including any locked symbols, will be saved and be available to continue playing at the same stake once the free spins have been completed.

Please note that this stateful game saves its state forever.

- Betting

To play the game, you must have sufficient funds to cover your bet. You can see your current BALANCE on your screen.

To start playing, first select the bet value. Click/tap “+” or “-” to increase or reduce the bet or click/tap on the bet value in the middle and select a bet value from a scrollable list. Please note that the selected bet will be applied to each spin. If your balance becomes insufficient to play, you will receive automatic message which says there is "Insufficient funds".

Once you have chosen the bet, click/tap the SPIN button to start playing.

- Spin the Reels

If you are playing on desktop, click the Spin button or press the spacebar to spin.

Speed up each reel spin by pressing spacebar again, or by clicking on the reels. For TURBO SPIN, hold down the spacebar or the Spin button.

- Autoplay

Autoplay allows you to repeat your selected bet for a chosen number of game rounds. To start Autoplay, choose the desired bet value and then click/tap the Autoplay button.

In the Autoplay panel, you can start Autoplay by selecting the number of rounds you want your bet to be repeated for.

Your selected number of Autoplay rounds will be displayed on the Autoplay button. The number of remaining Autoplay rounds will be updated, once Autoplay is started.

Your total Autoplay bet amount is calculated by multiplying the number of Autoplay rounds with the value of your bet. It is indicated under each Autoplay option. The remaining Autoplay bet amount will also be displayed under the chosen Autoplay option, once Autoplay has started.

Your automatic game rounds will continue until either your chosen number of Autoplay rounds are complete, or you choose to stop Autoplay by clicking/tapping STOP.

The Autoplay will stop after a Bonus feature is completed.

While Autoplay is running, it is not possible to change your bet. You need to stop Autoplay to change the bet.

- Jackpot Game

Win one of the offered jackpot tiers when three or more jackpot symbols appear on the reels or the jackpot is triggered by a game feature. The chances of winning a jackpot increase in correlation with the size of the stake played. The jackpot is triggered randomly and can be won by playing any of the linked jackpot games. To win the jackpot, the player is not required to make any decision other than to spin the reels. The stake value cannot be changed during free spins. Internet connectivity issues may cause delays in jackpot messages or updates, but they do not affect actual jackpot wins. It is not possible for two players to win the same jackpot. In the event two jackpot winnings occur close to one another the jackpot will be assigned in their respective order. Due to connectivity issues the jackpot value displayed may differ from the effective jackpot value. The jackpot could be temporary deactivated, when this occurs all contributions are paused. The jackpot amount available upon reactivation will be the same as before the deactivation.

The rules for Jackpot discontinuation and Jackpot fund allocation are defined by each Operator at their own discretion.

- Progressive Jackpot

The progressive jackpot is accumulated by all stakes on games offering these jackpots and, in some cases, the jackpots may be offered on multiple websites. A percentage of each total bet is added to a common pot. Part of this contribution is used to form the progressively increasing jackpot amounts, and the other part, contributes to a seed fund, which is the minimum amount of money guaranteed to be made available to players after a jackpot is won by qualifying players. Once the jackpot has been won, a new progressive jackpot will be made available and the process repeats. The jackpot can be triggered and won by a single spin from a single user only. The jackpot does not have a ceiling value. The odds of winning the jackpot increases with the size of the jackpot and can be won at any time. When the jackpot is won by another player, a notification appears in the jackpot panel. Once won, the amount is transferred directly to the user wallet, even if it is won during a bonus spin.

- General types of games

Check the pays menu in the game payable if you are not sure of the game type.

If you are playing a Lines game, the prize value from one payline is equal to the total stake divided by the number of paylines, multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

Example: Total stake is 2. Total paylines are 20. Symbol multiplier for length of 5 is 300. The win for 1 payline with this symbol and length would be calculated as such: $2 / 20 * 300 = 30$.

If you are playing a Ways, a MegaWays or a Cluster game, the prize value from one way or cluster in a Ways or Winning Clusters game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed.

Example: Total stake = 2. Symbol win multiplier = 2. Win = $2 \times 2 = 4$.

Winning combinations and payouts are made according to the Paytable.

Symbol payout values shown in the Paytable are dynamic and change in accordance with the selected stake value.

If you are playing a Lines game, the prize value from one payline is equal to the payout advertised in the Paytable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

If you are playing a Ways or a Cluster game, the prize value from one way or winning cluster is equal to the payout advertised in the paytable. Where multiple wins occur on multiple ways or clusters, the total win values are summed. If more than one win occurs on the same way or cluster, the largest win is paid. If more than one win occurs on the same way or cluster, the largest win is paid.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.

Please be aware that each account allows only a single game to be played at any one time. Therefore, a game should not be played on more than one device, or multiple games on the same device simultaneously. Doing so may lead to various errors.
