

SPECIAL SYMBOLS AND FEATURES

COIN FEATURE

COINS are WILD symbols that substitute for all paying symbols and appear only on the middle reel. All COINS have a multiplier value on their backside. A COIN will flip if it participates in a win line. If it lands with the multiplier value face up then all win lines that pass through the COIN will have that multiplier applied to them. Multiple COINS can appear on a single spin. The maximum multiplier that can be gained from the COIN feature is x50.

BULLET SPINS

The BULLET SPINS symbol is a scatter. Three symbols on reels 1, 3 & 5 triggers six to eight BULLET SPINS. At least one COIN on the middle reel on each spin is guaranteed during BULLET SPINS. During the bonus rounds when a COIN awards with a multiplier, it will instead be added to a growing global multiplier that applies to all formed win lines. The global multiplier will reset when BULLET SPINS ends. Scatters do not appear in BULLET SPINS and thus no bonus spins will be awarded during the bonus round.

DOUBLE OR NOTHING

When BULLET SPINS ends, players can choose to either COLLECT or GAMBLE their current win. If GAMBLE is picked, a COIN with a blank side and a "DOUBLE" side will be flipped. When the COIN lands with the "DOUBLE" side face up the win is doubled and the feature ends. If the COIN lands with the blank side face up the BULLET SPINS prize will be lost.

SECOND CHANCE

Randomly during the normal game, if one or more COINS flipped and did not award a multiplier, a second chance can activate to flip the COINS on their multiplier side.

If the COIN lands with the blank side face up after DOUBLE OR NOTHING, a random second chance can activate to flip the COIN to the "DOUBLE" side. This mechanic improves the odds of the COIN ending in "DOUBLE", making the GAMBLE strategy more favourable. The resulting Gamble RTP after this feature is 101%.

BEST DOUBLE OR NOTHING STRATEGY

The BEST DOUBLE OR NOTHING STRATEGY is to always gamble.

You can have different progress levels at different stakes on the same game, and move between them by changing the stake.

If you are awarded free spins from a promotional campaign any progress in the main game including any locked symbols, will be saved and be available to continue playing at the same stake once the free spins have been completed.

Jackpot Game

Win one of the offered jackpot tiers when three or more jackpot symbols appear on the reels or the jackpot is triggered by a game feature. The chances of winning a jackpot increase in correlation with the size of the stake played. The jackpot is triggered randomly and can be won by playing any of the linked jackpot games. To win the jackpot, the player is not required to make any decision other than to spin the reels. The stake value cannot be changed during free spins. Internet connectivity issues may cause delays in jackpot messages or updates, but they do not affect actual jackpot wins. It is not possible for two players to win the same jackpot. In the event two jackpot winnings occur close to one another the jackpot will be assigned in their respective order. Due to connectivity issues the jackpot value displayed may differ from the effective jackpot value. The jackpot could be temporary deactivated, when this occurs all contributions are paused. The jackpot amount available upon reactivation will be the same as before the deactivation.

The rules for Jackpot discontinuation and Jackpot fund allocation are defined by each Operator at their own discretion.

Progressive Jackpot

The progressive jackpot is accumulated by all stakes on games offering these jackpots and, in some cases, the jackpots may be offered on multiple websites. A percentage of each total bet is added to a common pot. Part of this contribution is used to form the progressively increasing jackpot amounts, and the other part, contributes to a seed fund, which is the minimum amount of money guaranteed to be made available to players after a jackpot is won by qualifying players. Once the jackpot has been won, a new progressive jackpot will be made available and the process repeats. The jackpot can be triggered and won by a single spin from a single user only. The jackpot does not have a ceiling value. The odds of

winning the jackpot increases with the size of the jackpot and can be won at any time. When the jackpot is won by another player, a notification appears in the jackpot panel. Once won, the amount is transferred directly to the user wallet, even if it is won during a bonus spin.

Auto finish

This game saves its state for 5 calendar days from the date of the last action taken. If the game remains uncompleted after 5 days, the Auto Complete function will complete the game by utilizing the Best Strategy for the game. Any winnings will be automatically added to the user balance.

General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

Winning combinations and payouts are made according to the Paytable.

If you are playing a Lines game, the prize value from one payline is equal to the total stake multiplied by the symbol multiplier advertised in the Paytable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

If you are playing a Ways or a Cluster game, the prize value from one way or winning cluster is equal to the payout advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed. If more than one win occurs on the same way or cluster, the largest win is paid.

During the Free Spins bonus rounds, the game uses a different set of reel strips.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.
