HOT OFFERS

- Land 5 or more chips on any spin to trigger the HOT OFFER feature.
- Some chips will have cash values on them, some will be marked with a “?” to indicate that they are mystery values.
- The HOT OFFER panel will appear, you must decide to:
- TAKE OFFER: Win the over value shown in the panel (click the button with the CASH icon)
- TAKE CHIPS: Reveal the mystery values, and collect all chip values shown on the reels (click the button with the CHIP icon)

Mystery values are drawn at random from the available options at the current chip level.

CHIP UP METER

- All landed chips also contribute to the CHIP UP METER.
- Every 25 chips collected will result in the chip colour and chip values being promoted.
- There are 8 levels. Once you hit level 8 (gold chips) you cannot be promoted again and chip collection is ignored.
- Triggering a HOT OFFER will result in the meter being reset at the start of the next spin.
- Chips landed as part of the HOT OFFER feature are credited to the meter at the start of the next spin after it is reset.
- Chip collection and meter progress is stored separately for each bet level.

Chip values at each level are selected from the following ranges (multiples of current bet):

1. RED: x0.75 to x10
2. BLUE: x1 to x15
3. GREEN: x1.5 to x20
4. PURPLE: x2 to x25
5. PINK: x2.5 to x50
6. BRONZE: x3 to x75
7. SILVER: x4 to x80
8. GOLD: x5 to x100

DOUBLE UP FREE SPINS

- Land 3 BONUS scatter symbols on reels 2, 3 and 4 to win 7 free spins.
- Free spins will begin with chips at whatever the current chip level is when the bonus is triggered.

- All chip positions now land as a “stack” of 2 chips, doubling the value of each landed position. The value shown on the stack is the combined value of the entire stack. This includes MEGA CHIPS.
- Chip collection is doubled, each chip stack landed will now contribute 2 positions to the meter.
- Triggering a HOT OFFER will not reset the meter during free spins, unless the HOT OFFER is on the final free spin.
- During free spins all line wins pay at x2.
- Land BONUS scatter symbols on reels 2, 3 and 4 during free spins to win 7 additional spins!

Free spins are played with the same lines and total stake value as the triggering spin.

HOW TO PLAY

- Select your total bet or use the default.
- Press the Spin button to start the game.
- Wins are multiplied by the bet.

HOW TO CALCULATE PAY LINE WINS

- To calculate your total payline win, calculate all payline wins and add them together.
- To calculate a single payline win, count the number of identical symbols lined up in sequence on the line starting from the left most reel.
- If three or more identical symbols are lined up, find the win value in the pay table. There you can find the value for all symbols for 3 in a row, 4 in a row and 5 in a row. Only the highest winning combination per line is paid out.
- If the winning combination starts with three wilds, there can be many ways to interpret the win. In this scenario, only the highest win combination is paid out.
- The above doesn't include Free Spin symbols which do not need to be on a payline to award a prize.
- After the Free Spins round is completed, all wins are added to any win from the game that activated the Free Spins.
- Collection Free Spin wins are rounded to nearest even value (using the bankers rounding algorithm) to avoid showing a fraction of a cent. The total win in the end screen displays the final rounded win.

MAXIMUM WIN

- Any combination of wins in a single game is limited and will not exceed 250,000.00. It may not be possible to reach this limit in a single game from every bet configuration.

RANDOMIZATION

- The reels are spun with a fair and equal chance for each stop position by a certified random number generator.

ADDITIONAL INFORMATION

- In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets are refunded.
