

SPECIAL SYMBOLS AND FEATURES

CHAIN REACTION

Symbols forming wins disappear, making way for new symbols to drop in that may form new wins.

FORTUNE TREE

There is an apple tree placed right above the reels. Called the Fortune Tree, it is full of apples that may drop at any moment. At the start of a spin, the Fortune Tree might shake and activate. One of two kinds of apples will then randomly drop before the symbols have landed. Sometimes, the Fortune Tree may activate in a non-winning spin or at the very end of chain reaction. In such cases, the Fortune Tree will always drop Golden Apples, but might possibly drop Diamond Apples as well.

GOLDEN APPLE

Golden Apples are triggered by the Fortune Tree. All Golden Apples that have dropped on the reels will reveal the same paying symbol. Up to 10 Golden Apples may fall from a single activation of the Fortune Tree.

DIAMOND APPLE

Diamond Apples are triggered by the Fortune Tree. All Diamond Apples that have dropped on the reels will reveal a random multiplier. Whenever a win occurs immediately after a Diamond apple has fallen, the multiplier will be stored above the reels. Multiple multipliers will be added up and applied to all accumulated wins at the end of the spin. The first multiplier to appear for such spins will become a global multiplier and any other multipliers appearing after that are added to the existing one. Multipliers always reset on the next spin. Up to 3 Diamond Apples may fall from a single activation of the Fortune Tree.

Diamond Apples may land with the following multipliers:

x2, x3, x5, x7, x10, x15, x20, x25, x50, x100

FREE SPINS

When 3 or more FREE SPINS scatters appear on the reels, it triggers the bonus round for 10, 12 or 15 FREE SPINS rewarded for 3, 4 or 5 scatters respectively. The Fortune Tree will activate in the same way as described during regular spins, except that it has the chance to activate more frequently. If 3 FREE SPINS scatter symbols land during the FREE SPIN bonus, 5 bonus spins are awarded on top of the spins that remain for the original bonus.

HOW TO PLAY HAPPY APPLES

Total Stake

The Total Stake is the total of stakes per line. You can adjust it at any time, using the + or – buttons.
Spin the Reels

If you are playing on desktop, click the Spin button or press the spacebar to spin.

Jackpot Game

Win one of the offered jackpot tiers when three or more jackpot symbols appear on the reels or the jackpot is triggered by a game feature. The chances of winning a jackpot increase in correlation with the size of the stake played. The jackpot is triggered randomly and can be won by playing any of the linked jackpot games. To win the jackpot, the player is not required to make any decision other than to spin the reels. The stake value cannot be changed during free spins. Internet connectivity issues may cause delays in jackpot messages or updates, but they do not affect actual jackpot wins. It is not possible for two players to win the same jackpot. In the event two jackpot winnings occur close to one another the jackpot will be assigned in their respective order. Due to connectivity issues the jackpot value displayed may differ from the effective jackpot value. The jackpot could be temporary deactivated, when this occurs all contributions are paused. The jackpot amount available upon reactivation will be the same as before the deactivation.

The rules for Jackpot discontinuation and Jackpot fund allocation are defined by each Operator at their own discretion.

Progressive Jackpot

The progressive jackpot is accumulated by all stakes on games offering these jackpots and, in some cases, the jackpots may be offered on multiple websites. A percentage of each total bet is added to a common pot. Part of this contribution is used to form the progressively increasing jackpot amounts, and the other part, contributes to a seed fund, which is the minimum amount of money guaranteed to be made available to players after a jackpot is won by qualifying players. Once the jackpot has been won, a new progressive jackpot will be made available and the process repeats. The jackpot can be triggered and won by a single spin from a single user only. The jackpot does not have a ceiling value. The odds of winning the jackpot increases with the size of the jackpot and can be won at any time. When the jackpot is won by another player, a notification appears in the jackpot panel. Once won, the amount is transferred directly to the user wallet, even if it is won during a bonus spin.

General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

The prize value from one payline is equal to the total stake divided by the number of paylines, multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

Example: Total stake is 2. Total paylines are 20. Symbol multiplier for length of 5 is 300. The win for 1 payline with this symbol and length would be calculated as such: $2 / 20 * 300 = 30$.

The prize value from one payline in a Multiline game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid.

Example: Stake is 2. Symbol multiplier for length of 5 is 20. The win for 1 payline with this symbol and length would be calculated as such: $2 * 20 = 40$.

The prize value from one way or cluster in a Ways or Winning Clusters game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed.

If more than one win occurs on the same way or cluster, the largest win is paid.

Example: Total stake = 2. Symbol win multiplier = 2. Win = $2 \times 2 = 4$.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.
