

SPECIAL SYMBOLS AND FEATURES

WILD

The WILD symbol substitutes for all paying symbols which can participate in a win line. Additionally the awards from any win lines in which one or more WILDS participate are tripled.

GOLD & PLATINUM RECORDS

Gold and Platinum Records are scatters that may land anywhere on the reels. They do not participate in win lines and instead hold a monetary value representing a stake MULTIPLIER. Gold Records hold between 1x and 5x your current stake and Platinum Records may hold any of the following multipliers: 7x, 10x, 12x, 15x, 20x, 25x.

The prizes held by the record symbols can be won during the LOCK THE RECORDS feature.

During the normal game both Gold and Platinum record symbols may lock for between 1 and 5 spins when they land to increase the chance of triggering the feature.

LOCK THE RECORDS

Landing any 3 record symbols anywhere on the reels starts THE LOCK THE RECORDS feature with 3 FREE RESPINS. Landing 4 records grants 4 FREE RESPINS. Landing 5 records grants 5 FREE RESPINS. During LOCK THE RECORDS all records that triggered the feature will be locked in place and RESPINS with only record symbols will begin. The number of RESPINS available is determined by the number of records that triggered the feature. Each new record that lands resets the RESPINS back to their initial count and also remains locked in place for the duration of the bonus round.

Each new record that lands also adds its prize to every other record present on the slot. If two or more records land in the same RESPIN they do not boost each other's prizes, but only those of the records locked in previous RESPINS.

The feature ends if no new records land for the duration of the count of RESPINS awarded at the start of the bonus round.

When the LOCK THE RECORDS feature ends the total win amount accumulated by the records present on the slot is paid out. In addition, a full screen of records doubles that award.

HOW TO PLAY ROCK 'N' LOCK

Game Progress

Any progress features in the game, including symbols locked onto the reels which affect subsequent spins, are saved for your game at the stake level you are playing at.

You can have different progress levels at different stakes on the same game, and move between them by changing the stake.

If you are awarded free spins from a promotional campaign any progress in the main game including any locked symbols, will be saved and be available to continue playing at the same stake once the free spins have been completed.

Please note that this stateful game saves its state forever.

Jackpot Game

Win one of the offered jackpot tiers when three or more jackpot symbols appear on the reels or the jackpot is triggered by a game feature. The chances of winning a jackpot increase in correlation with the size of the stake played. The jackpot is triggered randomly and can be won by playing any of the linked jackpot games. To win the jackpot, the player is not required to make any decision other than to spin the reels. The stake value cannot be changed during free spins. Internet connectivity issues may cause delays in jackpot messages or updates, but they do not affect actual jackpot wins. It is not possible for two players to win the same jackpot. In the event two jackpot winnings occur close to one another the jackpot will be assigned in their respective order. Due to connectivity issues the jackpot value displayed may differ from the effective jackpot value. The jackpot could be temporary deactivated, when this occurs all contributions are paused. The jackpot amount available upon reactivation will be the same as before the deactivation.

The rules for Jackpot discontinuation and Jackpot fund allocation are defined by each Operator at their own discretion.

Progressive Jackpot

The progressive jackpot is accumulated by all stakes on games offering these jackpots and, in some cases, the jackpots may be offered on multiple websites. A percentage of each total bet is added to a common pot. Part of this contribution is used to form the progressively increasing jackpot amounts, and the other part, contributes to a seed fund, which is the minimum amount of money guaranteed to be made available to players after a jackpot is won by qualifying players. Once the jackpot has been won, a new progressive jackpot will be made available and the process repeats. The jackpot can be triggered and won by a single spin from a single user only. The jackpot does not have a ceiling value. The odds of winning the jackpot increases with the size of the jackpot and can be won at any time. When the jackpot is won by another player, a notification appears in the jackpot panel. Once won, the amount is transferred directly to the user wallet, even if it is won during a bonus spin.

General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

Winning combinations and payouts are made according to the Paytable.

If you are playing a Lines game, the prize value from one payline is equal to the total stake multiplied by the symbol multiplier advertised in the Paytable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

If you are playing a Ways or a Cluster game, the prize value from one way or winning cluster is equal to the payout advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed. If more than one win occurs on the same way or cluster, the largest win is paid.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.

Please be aware that each account allows only a single game to be played at any one time. Therefore, a game should not be played on more than one device, or multiple games on the same device simultaneously. Doing so may lead to various errors.
