

SPECIAL SYMBOLS AND FEATURES

MEGAWAYS™

Each spin awards a different ways to win combination depending on the total number of symbols which land on the reels. Landing a maximum of 7 symbols on each of the 6 reels offers a potential 117,649 MegaWays™ to win!

CHAIN REACTION

Symbols forming wins disappear, giving way for new symbols to drop in that may form new wins.

ROYAL CORGIS

The Royal Corgis are Super scatter symbols which always land in their full size and cover a whole reel. The Royal Corgis have a ways multiplier of 2x applied to all win ways which the WILD participates in. If both Corgis participate in a win way, their multipliers are multiplied by each other.

There are two types of Corgis. A male Corgi that only lands on the 2nd reel and a female Corgi that only lands on the 5th reel.

The Royal Corgis are not destroyed when participating in a win way. Corgis can also land after a cascade if all tiles on the corresponding reels have been destroyed. The win ways are awarded before the QUEEN SPINS are triggered.

QUEEN SPINS

Landing both Royal Corgis in the same spin triggers 10 QUEEN SPINS. The Royal Corgis will lock for the duration of QUEEN SPINS.

No retriggers of QUEEN SPINS are available during the bonus round.

RISING MULTIPLIER

Each win during QUEEN SPINS will increase a Rising Multiplier that applies to all wins up to 20x. The multiplier resets at the end of the bonus round.

BABY CORGIS

During QUEEN SPINS, the Baby Corgis bonus may be randomly triggered. The male and female Royal Corgis may send kisses and hearts to each other and spawn a random amount of between 2 and 5 Baby Corgis between them. The Baby Corgis are WILDS that substitute for all paying symbols. The Baby Corgis will not lock and they will disappear if they participate in a win way.

Expand the AUTOPLAY dialog by choosing MORE AUTOPLAY SETTINGS. Here you can select additional criteria for the AUTOPLAY stop including - Stop if single win exceeds certain amount; Stop on Bonus Feature.

Gamble Wheel

After a spin which results in a win of more than 0.10 GBP, the "Gamble" button is activated and the player may enter the Gamble game for a chance to increase their win.

The Gamble Wheel offers the player true odds and always plays 100% randomly with 100% RTP. The player can configure the Gamble using the following options:

Pressing the plus button increases the potential win on the ladder and recalculates the wheel's chances. Pressing the minus button decreases the potential win. The green section of the wheel displays the exact chance of winning. The red section displays the exact chance of losing. If the player commits to pressing the Gamble button, the pointer within the wheel will spin. If the pointer lands in the green area, the player wins the highlighted prize which they chose in advance. If the pointer lands on the red area the Gamble is over and the player returns to the slot game.

The player doesn't have to collect the winnings manually. They are auto-collected after every Gamble round. Press the "Collect" button to collect your winnings and return to the slot game. If the Gamble feature is closed, the player cannot return to the feature unless they win another round in the slot game. The Gamble feature is disabled during auto-play. Jackpot winnings cannot be gambled.

General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

The prize value from one payline is equal to the total stake divided by the number of paylines, multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

Example: Total stake is 2. Total paylines are 20. Symbol multiplier for length of 5 is 300. The win for 1 payline with this symbol and length would be calculated as such: $2 / 20 * 300 = 30$.

The prize value from one payline in a Multiline game is equal to the stake multiplied by the symbol multiplier advertised in the paytable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid.

Example: Stake is 2. Symbol multiplier for length of 5 is 20. The win for 1 payline with this symbol and length would be calculated as such: $2 * 20 = 40$.

The prize value from one way or cluster in a Ways or Winning Clusters game is equal to the stake multiplied by the symbol multiplier advertised in the paytable. Where multiple wins occur on multiple ways or clusters, the total win values are summed.

Example: Total stake = 2. Symbol win multiplier = 2. Win = $2 * 2 = 4$.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.
