

OSTRICH LUCK

1. EXPANDING WILD RE-SPIN

- A single wild symbol can land on reels 2,3 and 4. Each wild expands to cover the whole reel and awards +1 additional row for the duration of the bonus. The expanded wilds then lock and all other reel's re-spin. If a new wild lands as a result from the re-spin, additional re-spin is granted for a maximum of 3. 2 or more wilds, landed or revealed in the same spin, award only 1 re-spin. 3 wilds plus 4 egg symbols in a spin don't award re-spin!

2. EGGS LINK BONUS

- 4 or more egg symbols on the screen lock in place and trigger the eggs link bonus where 3 re-spins are awarded. During the bonus only more egg symbols may land and lock, each with a cash prize to be collected at the end of the bonus. Newly locked eggs reset the re-spin counter back to 3. The bonus is over when no more re-spins are left or the grid is full of eggs. The eggs link bonus can be won during the expanding wild re-spin and can be played on slot size 5x3, 5x4, 5x5, and 5x6.

3. EGG SYMBOLS

- During a normal spin, eggs land on all reels and pay when forming a line. In the eggs link bonus, each egg grants a different collectible cash prize, in a range respective to its cash prize colour. Eggs award their face value only in the bonus round.

4. HOW TO PLAY

- Adjust your total stake and spin the reels! The reels will spin and stop on a random position.
- This game saves its state for 5 calendar days, starting from the date of the last action taken. At times when the game remains uncompleted after 5 days, the auto complete functionality will finish the action. Any winnings will automatically be added to the user's balance.
- The prize value of a single payline is equal to the total stake divided by the number of total paylines for the game, multiplied by the symbol multiplier

presented in the paytable. In cases where multiple wins occur on multiple win lines in the same spin, their total win values are summed. If more than one win occurs on the same payline, only the largest win is paid. Example: the total stake is 2. The total paylines are 20. The symbol multiplier for 5 identical landed symbols is 300. The win for a single payline would be calculated as follows: $(2/20) * 300 = 30$. The prize value from one way or a cluster in a ways or winning clusters game is equal to the stake multiplied by the symbol multiplier advertised in the paytable. Where multiple wins occur in multiple ways or clusters, the total win values are summed. Example: Total stake = 2. Symbol win multiplier = 2. Win multiplier = $2 \times 2 = 4$. If there is a scatter symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same line.

- RTP: 94.48%
- Malfunction voids all pays and plays.
