

SPECIAL SYMBOLS AND FEATURES

COIN FEATURE

COINS are WILD symbols that substitute for all paying symbols and appear only on the middle reel. All COINS have a multiplier value on their backside. A COIN will flip if it participates in a win line. If it lands with the multiplier value face up then all win lines that pass through the COIN will have that multiplier applied to them. Multiple COINS can appear on a single spin. The maximum multiplier that can be gained from the COIN feature is x50.

BULLET SPINS

The BULLET SPINS symbol is a scatter. Three symbols on reels 1, 3 & 5 triggers six to eight BULLET SPINS. At least one COIN on the middle reel on each spin is guaranteed during BULLET SPINS. During the bonus rounds when a COIN awards with a multiplier, it will instead be added to a growing global multiplier that applies to all formed win lines. The global multiplier will reset when BULLET SPINS ends. Scatters do not appear in BULLET SPINS and thus no bonus spins will be awarded during the bonus round.

DOUBLE OR NOTHING

When BULLET SPINS ends, players can choose to either COLLECT or GAMBLE their current win. If GAMBLE is picked, a COIN with a blank side and a "DOUBLE" side will be flipped. When the COIN lands with the "DOUBLE" side face up the win is doubled and the feature ends. If the COIN lands with the blank side face up the BULLET SPINS prize will be lost.

SECOND CHANCE

Randomly during the normal game, if one or more COINS flipped and did not award a multiplier, a second chance can activate to flip the COINS on their multiplier side.

If the COIN lands with the blank side face up after DOUBLE OR NOTHING, a random second chance can activate to flip the COIN to the "DOUBLE" side. This mechanic improves the odds of the COIN ending in "DOUBLE", making the GAMBLE strategy more favourable. The resulting Gamble RTP after this feature is 101%.

BEST DOUBLE OR NOTHING STRATEGY

The BEST DOUBLE OR NOTHING STRATEGY is to always gamble.

General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

Winning combinations and payouts are made according to the Paytable.

If you are playing a Lines game, the prize value from one payline is equal to the total stake multiplied by the symbol multiplier advertised in the Paytable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

If you are playing a Ways or a Cluster game, the prize value from one way or winning cluster is equal to the payout advertised in the paytable. Where multiple wins occur on multiple ways or clusters, the total win values are summed. If more than one win occurs on the same way or cluster, the largest win is paid. If more than one win occurs on the same way or cluster, the largest win is paid.

During the Free Spins bonus rounds, the game uses a different set of reel strips.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.
