FEATURES DESCRIPTION

WILD RE-SPINS FEATURE

When 2 WILD symbols land together on the reels, a WILD re-spin is triggered, where the WILDS start dancing around the screen, changing their positions at random. The re-spin feature continues for as long as winning lines are formed or until one or more additional WILDs land to trigger the Free Spins Bonus. During re-spins every winning line is multiplied by x2.

DANCING FREE SPINS

When 3 or more WILDs land on the reels during normal spin or re-spin, a Free Spins Bonus is awarded. 3x, 4x and 5x WILDs award 6, 8, and 10 free spins with x3, x4, and x5 Win Multiplier, respectively. Newly landed WILDs grant +2 extra free spins and +1 Win Multiplier for a maximum of x5. The multiplier counter applies to all winnings for the entire bonus. The Wilds remain on the screen and change their positions on each free spin until the bonus round is over. A single WILD can land per reel for up to 5 WILDS on the screen at any given time. A maximum of 10 free spins can be played in the dancing free spins bonus.

GAMBLE FEATURE

Guess the color or the suit of a card to double or quadruple your win. The maximum stake in the Gamble Feature is 10,000 EUR, or equivalent in another currency.

HOW TO PLAY

Adjust your total stake and spin the reels!

The reels will spin and stop on a random position.

Total Stake

The Total Stake is the total of stakes per line. You can adjust it at any time, using the + or - buttons.

Auto Complete

This game saves its state for 5 calendar days, starting from the date of the last action taken. At times when the game remains uncompleted after 5 days, the Auto Complete functionality will finish the action. Any winnings will be automatically added to the user's balance.

The prize value of a single payline is equal to the total stake divided by the number of total paylines for the game, multiplied by the symbol multiplier presented in the paytable. In cases where multiple wins occur on multiple win lines in the same spin, their total win values are summed. If more than one win occurs on the same payline, only the largest win is paid.
Example: The total stake is 2. The total paylines are 20. The symbol multiplier for 5 identical landed symbols is 300. The win for a single payline would be calculated as follows: (2 / 20) * 300 = 30.
The prize value from one way or a cluster in a Ways or Winning Clusters game is equal to the stake multiplied by the symbol multiplier advertised in the paytable. Where multiple wins occur in multiple ways or clusters, the total win values are summed.
Example: Total stake = 2. Symbol win multiplier = 2. Win = 2x2 = 4.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same line.

Please take into consideration that each account allows only for a single Cayetano Gaming game to be played at any given time. As a result, a single game can not be played on more than one device at a time, nor multiple games can be played on the same device simultaneously. Doing so may lead to various errors.
