

SPECIAL SYMBOLS AND FEATURES

MegaWays™

Each spin awards a different ways to win combination depending on the total number of symbols which lands on the reels.

Landing a maximum 7 symbols on each of the 6 reels offers a potential 117,649 MegaWays™ to win!

Avalanche™ Feature

The symbols fall into positions on the reels, instead of spinning. Symbols in winning combinations explode and disappear, leaving space for a second Avalanche™ of symbols for a chance of bigger wins.

The Avalanches™ continue until there are no more wins.

Avalanche™ Multiplier

Winning ways trigger the Avalanche™ Multiplier which increases the reward from each winning way occurring during the spin until it reaches the maximum multiplier. In the basic game the first win way increases it to X2, the second to X3 and the third to X5 which remains for the duration of the spin and applies to all subsequent wins.

The Avalanche™ Multiplier resets after the end of the spin.

Earthquake

The slot may randomly start to shake and all low-paying symbols will be destroyed allowing only high-paying symbols to take their place in the following respins.

High-paying symbols are the five symbols on the upper row and low-paying are the four symbols on the lower row of the Symbol Wins payable.

Unbreakable Wilds

Wilds do not break when they participate in a win. Their number will be limited to two on the reels at the same time. The first one can land on the first three reels and the second one on the second three reels. Wilds substitute for both paying symbols and Free Fall symbols.

Free Fall

Triggered by at least three Free Fall symbols or two Free Fall symbols and a Wild symbol, landing on adjacent reels starting from the leftmost reel. Each symbol contributes with +3 free spins for a possible total of 9, 12, 15 or 18. Up to four Free Fall symbols can land on the

reels. The maximum amount of Free Spins possible is awarded when the bonus round is triggered with four Free Fall Symbols connected with two Wild symbols.

In Free Fall the Avalanche™ Multiplier's progression is as follows: X3, X6, X9, X15.

After the end of the bonus round, the player returns to the previous scene, where the symbols that triggered Free Fall are destroyed for a chance of even more wins. The win multiplier from the last respin before the bonus round also remains until there are no more wins.

Additional Free Spins may be won during Free Fall. Additional Free Spins are triggered the same way Free Fall is triggered in Normal Game.

HOW TO PLAY GONZO'S QUEST™ MEGAWAYS™

Total Stake

The Total Stake is the total of stakes per line. You can adjust it at any time, using the + or – buttons.

Spin the Reels

If you are playing on desktop, click the Spin button or press the spacebar to spin.

Jackpot Game

Win one of the offered jackpot tiers when three or more jackpot symbols appear on the reels or the jackpot is triggered by a game feature. The chances of winning a jackpot increase in correlation with the size of the stake played. Jackpot prizes are not affected by any game features e.g. multipliers are never applied to jackpots. The jackpot is triggered randomly and can be won by playing any of the linked jackpot games. To win the jackpot, the player is not required to make any decision other than to spin the reels. The stake value cannot be changed during free spins. Internet connectivity issues may cause delays in jackpot messages or updates, but they do not affect actual jackpot wins. It is not possible for two players to win the same jackpot. In the event two jackpot winnings occur close to one another the jackpot will be assigned in their respective order. Due to connectivity issues the jackpot value displayed may differ from the effective jackpot value. The jackpot could be temporary deactivated, when this occurs all contributions are paused. The jackpot amount available upon reactivation will be the same as before the deactivation.

The rules for Jackpot discontinuation and Jackpot fund allocation are defined by each Operator at their own discretion.

The Jackpot is funded by 1% of each stake.

Progressive Jackpot

The progressive jackpot is accumulated by all stakes on games offering these jackpots and, in some cases, the jackpots may be offered on multiple websites. A percentage of each total bet is added to a common pot. Part of this contribution is used to form the progressively increasing jackpot amounts, and the other part, contributes to a seed fund, which is the minimum amount of money guaranteed to be made available to players after a jackpot is won by qualifying players. Once the jackpot has been won, a new progressive jackpot will be made available and the process repeats. The jackpot can be triggered and won by a single spin from a single user only. The jackpot does not have a ceiling value. The odds of winning the jackpot increases with the size of the jackpot and can be won at any time. When the jackpot is won by another player, a notification appears in the jackpot panel. Once won, the amount is transferred directly to the user wallet, even if it is won during a bonus spin.

General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

The prize value from one payline is equal to the total stake divided by the number of paylines, multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

Example: Total stake is 2. Total paylines are 20. Symbol multiplier for length of 5 is 300. The win for 1 payline with this symbol and length would be calculated as such: $2 / 20 * 300 = 30$.

The prize value from one payline in a Multiline game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid.

Example: Stake is 2. Symbol multiplier for length of 5 is 20. The win for 1 payline with this symbol and length would be calculated as such: $2 * 20 = 40$.

The prize value from one way or cluster in a Ways or Winning Clusters game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed.

If more than one win occurs on the same way or cluster, the largest win is paid.

Example: Total stake = 2. Symbol win multiplier = 2. Win = $2 \times 2 = 4$.

During the Free Spins bonus rounds, the game uses a different set of reel strips.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.

Please be aware that each account allows only a single game to be played at any one time. Therefore, a game should not be played on more than one device, or multiple games on the same device simultaneously. Doing so may lead to various errors.

In case of an incomplete game round due to connection loss where the result has not yet occurred, the game will generate an outcome for the round, which will be shown upon restoring of connection and the result will be visible in the Game History after refreshing the game.

In case of an incomplete game round due to connection loss where the result has occurred, but the player could not be informed of this fact, the game will inform the player of the outcome upon refreshing of the game and the result will be visible in the Game History.

Gaming session information

"Gaming session" is considered the time since the current game has been opened, until the time it is closed. Opening the game again from the lobby, or reloading the game in the browser is considered a new gaming session.

"Session timer" is being measured for the current gaming session only.

"Net position" is being based on the current gaming session only, calculating "all real money wins minus all real money bets."

For the best gaming experience, use of the latest version of software is recommended. Malfunction voids all pays and plays.

The RTP is $\approx XX.XX\%$ which includes base game RTP and jackpot contribution.

Minimum stake: \$x.xx

Maximum stake: \$x.xx
