

SPECIAL SYMBOLS AND FEATURES

BUFFALO COLLECTION

Each spin is numbered from 1 to 10, indicated by a spin counter above the reels. During the first 9 spins of the cycle each Buffalo symbol that lands on the reels is collected in a separate counter above the reels. Buffalo symbols landing in the 10th spin are not collected.

On the 10th spin the same number of collected Buffalo symbols are placed on random positions on the reels. More than one Buffalo symbol may be placed on the same position. Each additional Buffalo placed on the same position will add as a symbol MULTIPLIER to the symbol, increasing it by 1. Symbols holding a symbol MULTIPLIER count for as many symbols as the symbol MULTIPLIER displays in the win ways calculation.

WILD

WILD symbols substitute for all paying symbols. They land on reels 2, 3 and 4.

FREE SPINS

Landing 3, 4 or 5 FREE SPINS symbols in a spin triggers 8, 10 or 12 FREE SPINS respectively. Landing 2 FREE SPINS symbols on reels 2 and 4 during FREE SPINS awards 2 additional spins.

Collected Buffalo symbols in the base game are not transferred into the bonus round. At the end of the bonus round each player is returned to the base game with the number of collected Buffalo symbols they had upon entering.

FREE SPINS starts with 4 Buffalo symbols collected. During FREE SPINS the Buffalo Collection feature is triggered on each spin, placing the collected Buffalo symbols in the same way as in the base game. Each Buffalo symbol that lands during the bonus round will also be collected and increase the number of Buffalo symbols that appear for the remaining FREE SPINS.

During the bonus round WILDS that land on the reels receive a random symbol MULTIPLIER of either x2 or x3.

MAX WIN

The maximum win amount is limited to 10,000x your current stake. If the total win of a game round reaches 10,000x the round immediately ends, the maximum win is awarded, and any remaining FREE SPINS are forfeited.

HOW TO PLAY BUFFALO COLLECTOR

Jackpot Game

Win one of the offered jackpot tiers when three or more jackpot symbols appear on the reels or the jackpot is triggered by a game feature. The chances of winning a jackpot increase in correlation with the size of the stake played. The jackpot is triggered randomly and can be won by playing any of the linked jackpot games. To win the jackpot, the player is not required to make any decision other than to spin the reels. The stake value cannot be changed during free spins. Internet connectivity issues may cause delays in jackpot messages or updates, but they do not affect actual jackpot wins. It is not possible for two players to win the same jackpot. In the event two jackpot winnings occur close to one another the jackpot will be assigned in their respective order. Due to connectivity issues the jackpot value displayed may differ from the effective jackpot value. The jackpot could be temporary deactivated, when this occurs all contributions are paused. The jackpot amount available upon reactivation will be the same as before the deactivation.

The rules for Jackpot discontinuation and Jackpot fund allocation are defined by each Operator at their own discretion.

Progressive Jackpot

The progressive jackpot is accumulated by all stakes on games offering these jackpots and, in some cases, the jackpots may be offered on multiple websites. A percentage of each total bet is added to a common pot. Part of this contribution is used to form the progressively increasing jackpot amounts, and the other part, contributes to a seed fund, which is the minimum amount of money guaranteed to be

made available to players after a jackpot is won by qualifying players. Once the jackpot has been won, a new progressive jackpot will be made available and the process repeats. The jackpot can be triggered and won by a single spin from a single user only. The jackpot does not have a ceiling value. The odds of winning the jackpot increases with the size of the jackpot and can be won at any time. When the jackpot is won by another player, a notification appears in the jackpot panel. Once won, the amount is transferred directly to the user wallet, even if it is won during a bonus spin.

General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

If you are playing a Lines game, the prize value from one payline is equal to the total stake divided by the number of paylines, multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

Example: Total stake is 2. Total paylines are 20. Symbol multiplier for length of 5 is 300. The win for 1 payline with this symbol and length would be calculated as such: $2 / 20 * 300 = 30$.

If you are playing a Ways, a MegaWays or a Cluster game, the prize value from one way or cluster in a Ways or Winning Clusters game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed.

Example: Total stake = 2. Symbol win multiplier = 2. Win = $2 \times 2 = 4$.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.
