

## **SPECIAL SYMBOLS AND FEATURES**

### **CLOVERS**

Green Clovers and the Golden Clover are WILDS. WILDS substitute for all paying symbols.

### **GREEN CLOVER**

Green Clovers are WILD symbols that can land on reels 2, 3 and 4. They clone on the whole reel if they can form part of winning combination after cloning.

### **GOLDEN CLOVER**

Golden Clover can land only on reel 3. It is a WILD symbol that triggers Golden Clover features when it lands on the middle position of the reel.

If a Golden Clover lands but it is not on the middle position of the reel, it will turn into a Green Clover.

### **GOLDEN CLOVER x3**

Landing a Golden Clover in the middle of the 3rd reel and a Green Clover on an adjacent reel will form a BIG GOLDEN CLOVER 2x3 in size and with a x3 WIN MULTIPLIER.

### **GOLDEN CLOVER x7**

Landing a Golden Clover in the middle of the 3rd reel and Green Clovers on both adjacent reels will form a HUGE GOLDEN CLOVER 3x3 in size and with a x7 WIN MULTIPLIER.

### **GOLDEN CLOVER CASH RESPINS**

Landing a Golden Clover in the middle of the 3rd reel and either a Seven or a Bell symbol on an adjacent reel triggers the CASH RESPINS.

First, the Golden Clover will clone itself on the whole reel and any wins formed will be paid out. Then, all symbols of the same type as the one which triggered the CASH RESPINS will turn golden and receive a cash prize, representing a stake multiplier. Sevens receive a cash prize of 3x, while Bells receive a cash prize of 2x. Only one type of symbol triggers RESPINS. If both a Seven and a Bell symbol land on adjacent reels, CASH RESPINS will be triggered with the higher prize symbol (Sevens). After that the RESPINS start.

3 RESPINS are awarded in which only the symbols of the type that triggered them are active. Landing a new symbol of that type resets the RESPINS counter back to 3. RESPINS end when no new symbols of that type land in 3 consecutive RESPINS.

At the end of the RESPINS all cash prizes are added up and awarded to the player. Golden Clovers also count as cash prize symbols.

It is possible to trigger both the Golden Clover x3 and CASH RESPINS features. In this case the x3 WIN MULTIPLIER of the Big Golden Clover symbol is removed at the start of the CASH RESPINS and does not apply to the wins accumulated in them. The 2x3 Golden Clover counts as 6 cash prize symbols.

## **GOLDEN X CLOVER**

If a Golden Clover lands in the middle of the 3rd reel and no Green Clovers, Sevens or Bells land on adjacent reels, then the Golden Clover clones on the top and bottom positions of both adjacent reels, forming an X shape.

## **HOW TO PLAY CLOVER CRAZE**

### **Gamble Wheel**

After a spin which results in a win of more than 0.10 GBP, the "Gamble" button is activated and the player may enter the Gamble game for a chance to increase their win.

The Gamble Wheel offers the player true odds and always plays 100% randomly with 100% RTP. The player can configure the Gamble using the following options:

Pressing the plus button increases the potential win on the ladder and recalculates the wheel's chances. Pressing the minus button decreases the potential win. The green section of the wheel displays the exact chance of winning. The red section displays the exact chance of losing. If the player commits to pressing the Gamble button, the pointer within the wheel will spin. If the pointer lands in the green area, the player wins the highlighted prize which they chose in advance. If the pointer lands on the red area the Gamble is over and the player returns to the slot game.

The player doesn't have to collect the winnings manually. They are auto-collected after every Gamble round. Press the "Collect" button to collect your winnings and return to the slot game.

If the Gamble feature is closed, the player cannot return to the feature unless they win another round in the slot game. The Gamble feature is disabled during auto-play. Jackpot winnings cannot be gambled.

### Jackpot Game

Win one of the offered jackpot tiers when three or more jackpot symbols appear on the reels or the jackpot is triggered by a game feature. The chances of winning a jackpot increase in correlation with the size of the stake played. The jackpot is triggered randomly and can be won by playing any of the linked jackpot games. To win the jackpot, the player is not required to make any decision other than to spin the reels. The stake value cannot be changed during free spins. Internet connectivity issues may cause delays in jackpot messages or updates, but they do not affect actual jackpot wins. It is not possible for two players to win the same jackpot. In the event two jackpot winnings occur close to one another the jackpot will be assigned in their respective order. Due to connectivity issues the jackpot value displayed may differ from the effective jackpot value. The jackpot could be temporary deactivated, when this occurs all contributions are paused. The jackpot amount available upon reactivation will be the same as before the deactivation.

The rules for Jackpot discontinuation and Jackpot fund allocation are defined by each Operator at their own discretion.

### Progressive Jackpot

The progressive jackpot is accumulated by all stakes on games offering these jackpots and, in some cases, the jackpots may be offered on multiple websites. A percentage of each total bet is added to a common pot. Part of this contribution is used to form the progressively increasing jackpot amounts, and the other part, contributes to a seed fund, which is the minimum amount of money guaranteed to be made available to players after a jackpot is won by qualifying players. Once the jackpot has been won, a new progressive jackpot will be made available and the process repeats. The jackpot can be triggered and won by a single spin from a single user only. The jackpot does not have a ceiling value. The odds of winning the jackpot increases with the size of the jackpot and can be won at any time. When the jackpot is won by another player, a notification appears in the jackpot panel. Once won, the amount is transferred directly to the user wallet, even if it is won during a bonus spin.

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

Winning combinations and payouts are made according to the Paytable.

If you are playing a Lines game, the prize value from one payline is equal to the total stake multiplied by the symbol multiplier advertised in the Paytable. Where multiple wins occur on

multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

If you are playing a Ways or a Cluster game, the prize value from one way or winning cluster is equal to the payout advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed. If more than one win occurs on the same way or cluster, the largest win is paid. If more than one win occurs on the same way or cluster, the largest win is paid.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin. If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.
