

SPECIAL SYMBOLS AND FEATURES

All character symbols trigger a feature when they land. More than one character may land in a spin. In that case, they trigger their features consecutively in the following order: first Maid Marian, then Little John, then Robin Hood.

MAID MARIAN

When the Maid Marian symbol lands she blows kisses to add random WILDS on the reels.

Randomly, Maid Marian may blow more kisses and add more WILDS!

Formed win lines are paid once after all executions of the feature.

LITTLE JOHN

When the Little John symbol lands he will smash the ground and destroy all low-paying symbols on the reels allowing only high-paying symbols to land.

Randomly, after paying, Little John may smash the ground again and destroy all symbols that are not part of win lines and are not Wilds, for a chance of more winning symbols landing.

Win lines formed before the activation of the feature will be immediately paid out. After that formed win lines will be paid after each activation of the feature.

ROBIN HOOD

When the Robin Hood symbol lands he fires arrows at a random high-paying symbol, locking it and triggering a respin. Character symbols as well as Wilds triggered by the Maid Marian feature will also lock.

If new symbols of the locked type land, they will lock as well, triggering another respin.

Randomly, in a respin where no symbols of the locked type land, Robin Hood may shoot arrows again to add one or more symbols of the locked type and continue the respins.

Formed win lines are paid once after no more symbols of the locked type land.

HIGH-PAYING AND LOW-PAYING SYMBOLS

High-paying symbols are the four symbols on the upper row and low-paying are the five symbols on the lower row of the Symbol Wins payable.

HOW TO PLAY ROBIN HOOD'S WILD FOREST

Total Stake

The Total Stake is the total of stakes per line. You can adjust it at any time, using the + or – buttons.

Spin the Reels

If you are playing on desktop, click the Spin button or press the spacebar to spin.

Speed up each reel spin by pressing spacebar again, or by clicking on the reels. For TURBO SPIN, hold down the spacebar or the Spin button.

Autoplay

Press the AUTO button to commence automatic play of the game at the currently selected stake. Select how many spins to play via the Total Spins Dropdown menu.

More Autoplay settings

Select the loss limit: The Autoplay will stop at the last spin before the loss limit is reached. The Autoplay loss limit should be higher than your stake.

Expand the AUTOPLAY dialog by choosing MORE AUTOPLAY SETTINGS. Here you can select additional criteria for the AUTOPLAY stop including - Stop if single win exceeds certain amount; Stop on Bonus Feature.

Gamble Wheel

After a spin which results in a win of more than 0.10 GBP, the "Gamble" button is activated and the player may enter the Gamble game for a chance to increase their win.

The Gamble Wheel offers the player true odds and always plays 100% randomly with 100% RTP. The player can configure the Gamble using the following options:

Pressing the plus button increases the potential win on the ladder and recalculates the wheel's chances. Pressing the minus button decreases the potential win. The green section of the wheel displays the exact chance of winning. The red section displays the exact chance of losing. If the player commits to pressing the Gamble button, the pointer within the wheel will spin. If the pointer lands in the green

area, the player wins the highlighted prize which they chose in advance. If the pointer lands on the red area the Gamble is over and the player returns to the slot game.

The player doesn't have to collect the winnings manually. They are auto-collected after every Gamble round. Press the "Collect" button to collect your winnings and return to the slot game.

If the Gamble feature is closed, the player cannot return to the feature unless they win another round in the slot game. The Gamble feature is disabled during auto-play. Jackpot winnings cannot be gambled.

General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

Winning combinations and payouts are made according to the Paytable.

If you are playing a Lines game, the prize value from one payline is equal to the total stake multiplied by the symbol multiplier advertised in the Paytable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

If you are playing a Ways or a Cluster game, the prize value from one way or winning cluster is equal to the payout advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed. If more than one win occurs on the same way or cluster, the largest win is paid. If more than one win occurs on the same way or cluster, the largest win is paid.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.

Please be aware that each account allows only a single game to be played at any one time. Therefore, a game should not be played on more than one device, or multiple games on the same device simultaneously. Doing so may lead to various errors.

In case of an incomplete game round due to connection loss where the result has not yet occurred, the game will generate an outcome for the round, which will be shown upon restoring of connection and the result will be visible in the Game History after refreshing the game.

In case of an incomplete game round due to connection loss where the result has occurred, but the player could not be informed of this fact, the game will inform the player of the outcome upon refreshing of the game and the result will be visible in the Game History.

For the best gaming experience, use of the latest version of software is recommended.

Malfunction voids all pays and plays.

RTP \approx XX.XX%

The calculated max multiplier of the game is 1003.
