

SPECIAL SYMBOLS AND FEATURES

PRIZE SYMBOLS & ASCENDING THE ASTRO

The Astro pyramid has 5 levels and a top win. Each row is a separate level. The base spin is held on the 1st (bottom) level.

The symbols display a STAKE MULTIPLIER award shown as a monetary value.

The possible prizes on the symbols are:

0.1x, 0.2x, 0.3x, 0.5x, 1x, 2x, 5x, 10x, 20x, 100x.

At least 3 of a kind award the prize shown on the matching symbols. Those symbols become ACTIVE. Only one prize from the first 3 matching ACTIVE SYMBOLS is awarded, but if additional ACTIVE SYMBOLS land, the amount displayed on them is added up for your prize.

For example, landing 3 symbols with a 3x prize will award a prize equal to 3x the current stake, but landing 4 such symbols will award a 6x prize and landing 5 will award 9x prize.

Landing 3 matching symbols on the 1st level unlocks the next level.

At least 3 symbols of an ACTIVE kind need to land on each level to unlock the next. Starting from level 2, landing any additional ACTIVE SYMBOLS adds up to the overall win by the amount displayed on the newly landed ACTIVE SYMBOLS even if less than 3 of them have landed on each new level.

A symbol is only active on level 2 or higher if there are at least 3 of the same symbol on the immediate previous level.

Landing less than 3 matching ACTIVE SYMBOLS on any level ends the spin and the overall accumulated price is paid out.

LEVEL MULTIPLIERS

Each level except the base level has a corresponding multiplier displayed to the right:

Level 2: x2

Level 3: x5

Level 4: x10

Level 5: x50

When landing matching ACTIVE SYMBOLS on a certain level, the amount being added to the overall win is multiplied by the corresponding level's MULTIPLIER.

WILD

WILDS substitute for all symbols except Bonus scatter and may land on each level.

SEVEN PRIZES BONUS

Bonus scatters may land on level 3. Landing at least one Bonus scatter triggers the SEVEN PRIZES BONUS. During this Bonus, stake multiplier prize symbols are shuffled on 7 positions. A random prize will land on any position and the overall amount accumulated by the SEVEN PRIZES will be paid out.

The possible prizes that may land on each of the 7 positions are:

1x, 2x, 5x, 10x, 20x, 100x.

In case of more than one Bonus scatter on level 3, the prize from the SEVEN PRIZES BONUS will be multiplied by the amount of Bonus scatters that triggered the Bonus round.

Landing 3 ACTIVE SYMBOLS on level 5 unlocks the final prize of 5000x the current stake. That prize will be added to the thus far accumulated win, the spin will end and the total win will be paid out.

HOW TO PLAY ASTROS

Total Stake

The Total Stake is the total of stakes per line. You can adjust it at any time, using the + or – buttons.

Spin the Reels

If you are playing on desktop, click the Spin button or press the spacebar to spin.

Speed up each reel spin by pressing spacebar again, or by clicking on the reels. For TURBO SPIN, hold down the spacebar or the Spin button.

Autoplay

Press the AUTO button to commence automatic play of the game at the currently selected stake. Select how many spins to play via the Total Spins Dropdown menu.

More Autoplay settings

Select the loss limit: The Autoplay will stop at the last spin before the loss limit is reached. The Autoplay loss limit should be higher than your stake.

Expand the AUTOPLAY dialog by choosing MORE AUTOPLAY SETTINGS. Here you can select additional criteria for the AUTOPLAY stop including - Stop if single win exceeds certain amount; Stop on Bonus Feature.

Gamble Wheel

After a spin which results in a win of more than 0.10 GBP, the "Gamble" button is activated and the player may enter the Gamble game for a chance to increase their win.

The Gamble Wheel offers the player true odds and always plays 100% randomly with 100% RTP. The player can configure the Gamble using the following options:

Pressing the plus button increases the potential win on the ladder and recalculates the wheel's chances. Pressing the minus button decreases the potential win. The green section of the wheel displays the exact chance of winning. The red section displays the exact chance of losing. If the player commits to pressing the Gamble button, the pointer within the wheel will spin. If the pointer lands in the green area, the player wins the highlighted prize which they chose in advance. If the pointer lands on the red area the Gamble is over and the player returns to the slot game. The player doesn't have to collect the winnings manually. They are auto-collected after every Gamble round. Press the "Collect" button to collect your winnings and return to the slot game.

If the Gamble feature is closed, the player cannot return to the feature unless they win another round in the slot game. The Gamble feature is disabled during auto-play. Jackpot winnings cannot be gambled.

Jackpot Game

Win one of the offered jackpot tiers when three or more jackpot symbols appear on the reels or the jackpot is triggered by a game feature. The chances of winning a jackpot increase in correlation with the size of the stake played. The jackpot is triggered randomly and can be won by playing any of the linked jackpot games. To win the jackpot, the player is not required to make any decision other than to spin the reels. The stake value cannot be changed during free spins. Internet connectivity issues may cause delays in jackpot messages or updates, but they do not affect actual jackpot wins. It is not possible for two players to win the same jackpot. In the event two jackpot winnings occur close to one another the jackpot will be assigned in their respective order. Due to connectivity issues the jackpot value displayed may differ from the effective jackpot value. The jackpot could be temporary deactivated, when this occurs all contributions are paused. The jackpot amount available upon reactivation will be the same as before the deactivation.

The rules for Jackpot discontinuation and Jackpot fund allocation are defined by each Operator at their own discretion.

Progressive Jackpot

The progressive jackpot is accumulated by all stakes on games offering these jackpots and, in some cases, the jackpots may be offered on multiple websites. A percentage of each total bet is added to a common pot. Part of this contribution is used to form the progressively increasing jackpot amounts, and the other part, contributes to a seed fund, which is the minimum amount of money guaranteed to be made available to players after a jackpot is won by qualifying

players. Once the jackpot has been won, a new progressive jackpot will be made available and the process repeats. The jackpot can be triggered and won by a single spin from a single user only. The jackpot does not have a ceiling value. The odds of winning the jackpot increases with the size of the jackpot and can be won at any time. When the jackpot is won by another player, a notification appears in the jackpot panel. Once won, the amount is transferred directly to the user wallet, even if it is won during a bonus spin.

General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

The prize value from one payline is equal to the total stake divided by the number of paylines, multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

Example: Total stake is 2. Total paylines are 20. Symbol multiplier for length of 5 is 300. The win for 1 payline with this symbol and length would be calculated as such: $2 / 20 * 300 = 30$.

The prize value from one payline in a Multiline game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid.

Example: Stake is 2. Symbol multiplier for length of 5 is 20. The win for 1 payline with this symbol and length would be calculated as such: $2 * 20 = 40$.

The prize value from one way or cluster in a Ways or Winning Clusters game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed.

Example: Total stake = 2. Symbol win multiplier = 2. Win = $2 \times 2 = 4$.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.

Please be aware that each account allows only a single game to be played at any one time. Therefore, a game should not be played on more than one device, or multiple games on the same device simultaneously. Doing so may lead to various errors.

In case of an incomplete game round due to connection loss where the result has not yet occurred, the game will generate an outcome for the round, which will be shown upon

restoring of connection and the result will be visible in the Game History after refreshing the game.

In case of an incomplete game round due to connection loss where the result has occurred, but the player could not be informed of this fact, the game will inform the player of the outcome upon refreshing of the game and the result will be visible in the Game History.

For the best gaming experience, use of the latest version of software is recommended.

Malfunction voids all pays and plays.

RTP \approx XX.XX% which includes base game RTP and jackpot contribution.

Minimum stake: \$x.xx

Maximum stake: \$x.xx
