

## SPECIAL SYMBOLS AND FEATURES

### SUPER SYMBOLS

1x2 non-paying SUPER SYMBOLS activate a feature for the duration of the current spin when only one of the symbols appears on the reels. The RED HAMMER only appears on the second reel and the BLUE HAMMER only appears on the fourth reel. Landing only the RED HAMMER on the reels triggers the BROKKR FEATURE up to three times. Landing only the BLUE HAMMER on the reels triggers the SINDRI FEATURE up to three times. Wins will only be evaluated after all triggers are complete. SUPER SYMBOLS that have activated a feature turn into WILD SUPER SYMBOLS. Both RED & BLUE HAMMERS on the reels will instead activate FREE SPINS.

### BROKKR FEATURE

Turns all low-paying symbols into a single high-paying symbol type when triggered. It may be retriggered up to two more times in which case each following execution turns one high-paying symbol type into a better high-paying symbol type.

### SINDRI FEATURE

Turns one high-paying symbol type into WILD symbols when triggered. It may be retriggered up to two more times in which case each following execution turns another high-paying symbol type into WILD symbols.

### FREE SPINS

10 FREE SPINS are triggered when both SUPER SYMBOLS appear on the reels in a single spin. SUPER SYMBOLS do not appear in FREE SPINS and thus no bonus spins will be awarded during the bonus round. Instead, one, two, or three feature activations are guaranteed on each spin during FREE SPINS.

## HOW TO PLAY HAMMER GODS

### Total Stake

The Total Stake is the total of stakes per line. You can adjust it at any time, using the + or – buttons.

### Spin the Reels

If you are playing on desktop, click the Spin button or press the spacebar to spin.

### Autoplay

Press the AUTO button to commence automatic play of the game at the currently selected stake.

Select how many spins to play via the Total Spins Dropdown menu.

### More Autoplay settings

Select the loss limit: The Autoplay will stop at the last spin before the loss limit is reached. The Autoplay loss limit should be higher than your stake.

Expand the AUTOPLAY dialog by choosing MORE AUTOPLAY SETTINGS. Here you can select additional criteria for the AUTOPLAY stop including - Stop if single win exceeds certain amount; Stop on Bonus Feature.

### Gamble Wheel

After a spin which results in a win of more than 0.10 EUR, the "Gamble" button is activated and the player may enter the Gamble game for a chance to increase their win.

The Gamble Wheel offers the player true odds and always plays 100% randomly with 100% RTP. The player can configure the Gamble using the following options:

Pressing the plus button increases the potential win on the ladder and recalculates the wheel's chances. Pressing the minus button decreases the potential win. The green section of the wheel displays the exact chance of winning. The red section displays the exact chance of losing. If the player commits to pressing the Gamble button, the pointer within the wheel will spin. If the pointer lands in the green area, the player wins the highlighted prize which they chose in advance. If the pointer lands on the red area the Gamble is over and the player returns to the slot game.

The player doesn't have to collect the winnings manually. They are auto-collected after every Gamble round. Press the "Collect" button to collect your winnings and return to the slot game.

If the Gamble feature is closed, the player cannot return to the feature unless they win another round in the slot game. The Gamble feature is disabled during auto-play. Jackpot winnings cannot be gambled.

General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

Winning combinations and payouts are made according to the Paytable.

If you are playing a Lines game, the prize value from one payline is equal to the total stake multiplied by the symbol multiplier advertised in the Paytable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

If you are playing a Ways or a Cluster game, the prize value from one way or winning cluster is equal to the payout advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed. If more than one win occurs on the same way or cluster, the largest win is paid. If more than one win occurs on the same way or cluster, the largest win is paid.

During the Free Spins bonus rounds, the game uses a different set of reel strips.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.

Please be aware that each account allows only a single game to be played at any one time.

Therefore, a game should not be played on more than one device, or multiple games on the same device simultaneously. Doing so may lead to various errors.

In case of an incomplete game round due to connection loss where the result has not yet occurred, the game will generate an outcome for the round, which will be shown upon restoring of connection and the result will be visible in the Game History after refreshing the game.

In case of an incomplete game round due to connection loss where the result has occurred, but the player could not be informed of this fact, the game will inform the player of the outcome upon refreshing of the game and the result will be visible in the Game History.
