

SPECIAL SYMBOLS AND FEATURES

The Flaming Fox

The Flaming Fox Ninja meditates behind the reels and can spring into action at any time to activate some hot features!

Flaming Features

Upon activating, the Flaming Fox may smash away symbols or entire reels to reveal a second, flaming reel set behind. The flaming reels contain only complete rows of top-paying or WILD symbols for the chance of BIG WINS.

The Flaming Fox may go further and smash individual symbols a second time, transforming them into locked WILDS! WILD symbols substitute for all paying symbols.

Free Spins

Three FREE SPINS symbols or more, anywhere on the slot, trigger a random number of FREE SPINS. The more FREE SPINS symbols, the more FREE SPINS you win!

In FREE SPINS watch out for the Extra Spin symbol, which may appear in the flaming reel set to grant you extra spins.

All features triggered by the Flaming Fox remain LOCKED for the entire free spins session.

Expand the AUTOPLAY dialog by choosing MORE AUTOPLAY SETTINGS. Here you can select additional criteria for the AUTOPLAY stop including - Stop if single win exceeds certain amount; Stop on Bonus Feature.

Gamble Wheel

After a spin which results in a win of more than 0.10 GBP, the "Gamble" button is activated and the player may enter the Gamble game for a chance to increase their win.

The Gamble Wheel offers the player true odds and always plays 100% randomly with 100% RTP. The player can configure the Gamble using the following options:

Pressing the plus button increases the potential win on the ladder and recalculates the wheel's chances. Pressing the minus button decreases the potential win. The green section of the wheel displays the exact chance of winning. The red section displays the exact chance of losing. If the player commits to pressing the Gamble button, the pointer within the wheel will spin. If the pointer lands in the green area, the player wins the highlighted prize which they chose in advance. If the pointer lands on the red area the Gamble is over and the player returns to the slot game.

The player doesn't have to collect the winnings manually. They are auto-collected after every Gamble round. Press the "Collect" button to collect your winnings and return to the slot game.

If the Gamble feature is closed, the player cannot return to the feature unless they win another round in the slot game. The Gamble feature is disabled during auto-play. Jackpot winnings cannot be gambled.

General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

Winning combinations and payouts are made according to the Paytable.

If you are playing a Lines game, the prize value from one payline is equal to the total stake multiplied by the symbol multiplier advertised in the Paytable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

If you are playing a Ways or a Cluster game, the prize value from one way or winning cluster is equal to the payout advertised in the paytable. Where multiple wins occur on multiple ways or clusters, the total win values are summed. If more than one win occurs on the same way or cluster, the largest win is paid. If more than one win occurs on the same way or cluster, the largest win is paid.

During the Free Spins bonus rounds, the game uses a different set of reel strips.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.
