

## **SPECIAL SYMBOLS AND FEATURES**

### **MEGAWAYS™**

Up to 7 symbols may land on each of the 6 reels, giving a maximum potential 117,649 MegaWays™ to win!

### **CHAIN REACTION**

Symbols forming wins disappear, making way for new symbols to drop in that may form new wins. There is no limit to the possible chain reactions.

### **SUPER WILD**

SUPER WILD symbols may land on reels 2, 3, 4 and 5, but they can not land at the same time on reels 2 and 3. The SUPER WILDS cover an entire reel and have a symbol MULTIPLIER of between x2 and x7. The symbol MULTIPLIER represents how many symbols the SUPER WILD is being counted as in the ways calculation. SUPER WILDS do not disappear after participating in a winning combination.

### **HOLD & RESPIN**

Landing 3 or more Scatter symbols anywhere triggers the Hold & Respin bonus with 3 FREE SPINS. The bonus starts with a number of positions on each reel equal to the number of scatters that have triggered the Hold & Respin bonus.

At the start of the bonus round the player spins a wheel which awards a number of CASH symbols and a number of SAVES both with value of 2x the current stake. The possible number of CASH symbols awarded are 2, 3, 4, 5, 10 or 15. The possible number of SAVES are 1, 2, 3, 4 or 5.

The CASH symbols awarded from the wheel are then placed on random positions on the reels and lock for the duration of the HOLD & RESPIN bonus. The SAVES are displayed above the reels.

During the bonus round only CASH symbols, special symbols or empty symbols may land and every symbol position is a different reel. The CASH symbols hold a random CASH PRIZE, representing a stake MULTIPLIER.

The possible MULTIPLIERS of the CASH symbols landing during the round are 1x, 2x, 3x, 5x or 10x the current stake.

When CASH symbols land on the reels they lock for the duration of the bonus round.

Landing any CASH symbol or special symbol during the bonus round resets the spins back to 3. As long as there are remaining SAVES, if no new CASH symbols or special symbols land in 3 consecutive spins, one SAVE will be used to place a CASH symbol on a random empty position on the reels. If there are still remaining empty positions, the bonus round continues and the spins are reset back to 3. If all positions on the reels are filled with locked symbols any remaining SAVES will add their value to the total win of the bonus round.

There are 7 special symbols which may land in the bonus round, similar to the non-royal symbols in the base game. The special symbols act differently in the bonus and do not pay as in the base game. The special symbols are:

**PIGGY BANK** – the PIGGY BANK symbol holds a random CASH value, representing a stake MULTIPLIER of 1x, 2x, 3x, 5x or 10x the current stake. When a PIGGY BANK lands it breaks and its value is added on all adjacent positions (horizontally, vertically and diagonally) that are empty or are occupied by a CASH symbol. On the empty positions a CASH symbol with this value is placed, while on positions where a CASH symbol is already present, the value is added to the value of the CASH symbol. PIGGY BANK symbols do not lock on the reels.

**PURSE** – when a PURSE symbol lands it collects up to 5 CASH symbols present on the reels, adding up their value on the PURSE and removing the symbols, thereby freeing up their positions. Each PURSE will continue collecting cash symbols present on the reels until a maximum of 5 CASH symbols are collected. When PURSE symbols land on the reels they lock for the duration of the bonus round. If more than 1 PURSE is present, all PURSES will collect all present CASH symbols on the reels until each PURSE collects a maximum of 5 CASH symbols. If more than 5 cash symbols land on the reels while the PURSE symbol is present, the Purse will collect 5 of them at random.

**KEY** – when a KEY symbol lands it adds 1 additional row on top of the reels up to a maximum of 7 rows. KEY symbols cannot land after all rows are unlocked. KEY symbols do not lock on the reels.

**MONEY BAG** – the MONEY BAG symbol holds a random CASH value, representing stake MULTIPLIER. The possible MULTIPLIERS are 30x, 50x, 75x or 100x the current stake. When Money Bag symbols land on the reels they lock for the duration of the bonus round.

**GENTLEMAN PIG** – the GENTLEMAN PIG symbol holds a CASH value, representing stake MULTIPLIER, starting at 5x the current stake. The current value of GENTLEMAN PIG is displayed above the reels in the bonus round. Each GENTLEMAN PIG symbol that lands in a spin increases the values of all CASH and MONEY BAG symbols present on the reels by its current value. It also increases the value of each PURSE symbol present on the reels,

multiplied by the number of symbols collected in the PURSE. Following that, the value of GENTLEMAN PIG above the reels is increased for the following spins for each GENTLEMAN PIG that landed. The value of GENTLEMAN PIG increases as follows: 5x, 10x, 15x, 25x, 50x, 100x and resets at the end of the bonus round. GENTLEMAN PIG symbols do not lock on the reels.

LADY PIG – the LADY PIG symbol holds a MULTIPLIER, starting at x1. The current MULTIPLIER of LADY PIG is always displayed above the reels in the bonus round. Each LADY PIG symbol that lands in a spin collects the value of all CASH, PURSE and MONEY BAG symbols present on the reels and leaves a PRESENT on its position with their combined value, multiplied by the current MULTIPLIER of LADY PIG. Following that, the MULTIPLIER of LADY PIG above the reels increases for the following spins by 1 for each LADY PIG that landed. The MULTIPLIER of LADY PIG resets at the end of the bonus round. The PRESENTS left by LADY PIG lock on the reels for the duration of the bonus round.

CREDIT CARDS – each CREDIT CARDS symbol that lands increases the current value of both GENTLEMAN PIG and LADY PIG above the reels for the current and the following spins. The value of GENTLEMAN PIG is increased to the next possible value, while the MULTIPLIER of LADY PIG is increased by 1. If GENTLEMAN PIG has reached his maximum value, then the CREDIT CARDS symbol only increases the MULTIPLIER of LADY PIG. CREDIT CARDS symbols do not lock on the reels.

If more than one special symbol lands in a spin, the order in which they activate is as follows: PIGGY BANK, CREDIT CARDS, GENTLEMAN PIG, LADY PIG, PURSE, KEY.

The bonus round ends if no CASH or special symbols land in 3 consecutive spins after all SAVES have been used, or all positions on the reels are filled with locked symbols. At the end of the bonus round the player is awarded the combined prize of all CASH, PURSE, MONEY BAG and PRESENT symbols present on the reels, and the value of any remaining SAVES.

### Jackpot Game

Win one of the offered jackpot tiers when three or more jackpot symbols appear on the reels or the jackpot is triggered by a game feature. The chances of winning a jackpot increase in correlation with the size of the stake played. Jackpot prizes are not affected by any game features e.g. multipliers are never applied to jackpots. The jackpot is triggered randomly and can be won by playing any of the linked jackpot games. To win the jackpot, the player is not required to make any decision other than to spin the reels. The stake value cannot be changed during free spins. Internet connectivity issues may cause delays in jackpot messages or updates, but they do not affect actual jackpot wins. It is not possible for two players to win the same jackpot. In the event two jackpot winnings occur close to one another the jackpot will be assigned in their respective order. Due to connectivity issues the jackpot value displayed may differ from the effective jackpot value. The jackpot could be temporary deactivated, when this occurs all contributions are paused. The jackpot amount available upon reactivation will be the same as before the deactivation.

The rules for Jackpot discontinuation and Jackpot fund allocation are defined by each Operator at their own discretion.

The Jackpot is funded by 1% of each stake.

### Progressive Jackpot

The progressive jackpot is accumulated by all stakes on games offering these jackpots and, in some cases, the jackpots may be offered on multiple websites. A percentage of each total bet is added to a common pot. Part of this contribution is used to form the progressively increasing jackpot amounts, and the other part, contributes to a seed fund,

which is the minimum amount of money guaranteed to be made available to players after a jackpot is won by qualifying players. Once the jackpot has been won, a new progressive jackpot will be made available and the process repeats. The jackpot can be triggered and won by a single spin from a single user only. The jackpot does not have a ceiling value. The odds of winning the jackpot increases with the size of the jackpot and can be won at any time. When the jackpot is won by another player, a notification appears in the jackpot panel. Once won, the amount is transferred directly to the user wallet, even if it is won during a bonus spin.

### General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

If you are playing a Lines game, the prize value from one payline is equal to the total stake divided by the number of paylines, multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

Example: Total stake is 2. Total paylines are 20. Symbol multiplier for length of 5 is 300. The win for 1 payline with this symbol and length would be calculated as such:  $2 / 20 * 300 = 30$ .

If you are playing a Ways, a MegaWays or a Cluster game, the prize value from one way or cluster in a Ways or Winning Clusters game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed.

Example: Total stake = 2. Symbol win multiplier = 2. Win =  $2 \times 2 = 4$ .

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin. If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.
