The pays above are the pays awarded at minimum bet. The payable values at bets other than minimum are calculated by multiplying the bet multiplier by the payable values listed above. Only the highest win is paid per winning combination.

- To calculate the total win, add all the symbol wins together.
- To calculate a single symbol win, count the number of consecutive reels that contain the symbol, starting from the leftmost reel.
- If any of the reels contain more than 1 instance of the winning symbols, the win will be multiplied. Multiply the number of winning symbols on each of the reels to get the final multiplier. For example, if the first reel contains 1 symbol, the second reel 2 symbols and the third reel 3 symbols, the total multiplier is: $1 \times 2 \times 3 = 6$.
- Any total win in a game round will be displayed in the win display and then credited to the appropriate balance.
- All ways are active at all times.
- All wins pay left to right on adjacent reels beginning with the leftmost reel.
