

SPECIAL SYMBOLS AND FEATURES

CASH QUEEN

The CASH QUEEN is a 1x3 WILD SUPER SYMBOL that may land only on the middle reel and substitutes for all paying symbols. The CASH QUEEN is always fully visible when she lands. When she participates in a win line, the CASH QUEEN locks herself together with the winning symbols. After that a RESPIN is initiated and if more symbols of the locked type land in the next spin, the new symbols will lock as well and another RESPIN will occur.

If initially there are win lines from different symbol types, all winning symbol types will lock for the RESPIN. During RESPINS win lines with symbols that are not locked cannot be formed.

The RESPINS end if no additional symbols of the locked types land, after which the so far accumulated winnings are paid out and all locked symbols are unlocked. During ANARCHY SPINS the CASH QUEEN features a win MULTIPLIER.

ANARCHY SPINS

The ANARCHY SPINS symbol is a scatter. Three ANARCHY SPINS symbols on reels 1, 3 and 5 award 10 FREE SPINS. At the start of ANARCHY SPINS the CASH QUEEN locks on the middle reel for the duration of the bonus round.

The CASH QUEEN feature is the same as in the normal game but after the first cycle of RESPINS she participates in, the CASH QUEEN will receive a MULTIPLIER of 2x and at the end of every subsequent cycle of RESPINS that MULTIPLIER is increased by 1.

The MULTIPLIER is applied to all win lines during the bonus round and can grow up to 10x. The MULTIPLIER is only available during ANARCHY SPINS and is reset at the end of the bonus round.

The RESPINS triggered by the CASH QUEEN do not count towards the FREE SPINS available in the bonus round. If any ANARCHY SPINS symbols land on the 1st or the 5th reel during the bonus round, they will each grant 1 EXTRA FREE SPIN.

Gamble Wheel

After a spin which results in a win of more than 0.10 EUR, the "Gamble" button is activated and the player may enter the Gamble game for a chance to increase their win.

The Gamble Wheel offers the player true odds and always plays 100% randomly with 100% RTP. The player can configure the Gamble using the following options:

Pressing the plus button increases the potential win on the ladder and recalculates the wheel's chances. Pressing the minus button decreases the potential win. The green section of the wheel displays the exact chance of winning. The red section displays the exact chance of losing. If the player commits to pressing the Gamble button, the pointer within the wheel will spin. If the pointer lands in the green area, the player wins the highlighted prize which they chose in advance. If the pointer lands on the red area the Gamble is over and the player returns to the slot game.

The player doesn't have to collect the winnings manually. They are auto-collected after every Gamble round. Press the "Collect" button to collect your winnings and return to the slot game. If the Gamble feature is closed, the player cannot return to the feature unless they win another round in the slot game. The Gamble feature is disabled during auto-play. Jackpot winnings cannot be gambled.

General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

Winning combinations and payouts are made according to the Paytable.

If you are playing a Lines game, the prize value from one payline is equal to the total stake multiplied by the symbol multiplier advertised in the Paytable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

If you are playing a Ways or a Cluster game, the prize value from one way or winning cluster is equal to the payout advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed. If more than one win occurs on the same way or cluster, the largest win is paid. If more than one win occurs on the same way or cluster, the largest win is paid.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.
