

## SPECIAL SYMBOLS AND FEATURES

### MEGAWAYS™

The number of possible win ways varies per spin according to the total number of individual symbols which land on the reels, with a maximum potential of 321,489 MegaWays™ to win!

### CHAIN REACTION

Symbols forming wins disappear, making way for new symbols to drop in that may form new wins.

### FAN SYMBOLS

The Fan symbols are special scatter symbols that may land only on the topmost and bottom-most rows. Fan symbols may also appear after a cascade following a win, but again only on the topmost and bottom-most rows. More than one Fan symbol may land in the initial spin on each of those rows.

When 2 Fan symbols align on the same reel vertically, they unfold on the whole reel and reveal either a random super symbol variation of a paying symbol or the WILD Super Symbol. The revealed symbol has a ways multiplier from 4x to 9x.

In the normal game the Fans will lock and reveal a random new symbol on each spin until they reveal a symbol that participates in a win. If the Fans reveal a WILD Super Symbol it stays on the reels until it participates in a win instead of being swapped on each spin. If more than one pair of Fan symbols are on the screen at the same time they will all reveal the same type of symbols.

In FREE SPINS the fans that have revealed a symbol will stay locked until the end of the bonus round and reveal a new symbol on each spin. Again, WILD Super Symbols will not be replaced by other symbols before they have participated in a win. Also in FREE SPINS, if the symbol revealed by the fans participates in a win way, the symbols are destroyed and the fans show a new symbol in the following cascade.

### WILD SUPER SYMBOL

The WILD Super Symbol may only be revealed by the Fan symbols and it is not swapped until it participates in a win way. The WILD Super symbol substitutes for all paying symbols and also features a ways multiplier of between x4 and x9.

### FREE SPINS

3 FREE SPINS scatters anywhere on the reels award with 10 FREE SPINS. FREE SPINS scatters may also land during FREE SPINS, but only on reels 1 and 6. Each FREE SPINS scatter during the bonus round awards +1 Bonus spin.

The FREE SPINS bonus round starts with a x1 WIN MULTIPLIER and each win increases it by +1 up to a maximum of x20. The multiplier is applied to all wins during the bonus round. The WIN MULTIPLIER does not reset for the duration of FREE SPINS.

During FREE SPINS the Fans that have revealed a symbol do not leave the reels after the symbol revealed by them participates in a win way and instead stay locked until the end of the bonus round to reveal a new symbol on each spin. All symbols revealed by the Fans including the WILD Super Symbols leave the slot scene at the end of the bonus round regardless of whether they have participated in win way or not during the last FREE SPIN.

## HOW TO PLAY RISQUÉ MEGAWAYS™

### Game Progress

Any progress features in the game, including symbols locked onto the reels which affect subsequent spins, are saved for your game at the stake level you are playing at.

You can have different progress levels at different stakes on the same game, and move between them by changing the stake.

If you are awarded free spins from a promotional campaign any progress in the main game including any locked symbols, will be saved and be available to continue playing at the same stake once the free spins have been completed.

Please note that this stateful game saves its state forever.

### Total Stake

The Total Stake is the total of stakes per line. You can adjust it at any time, using the + or – buttons.

### Spin the Reels

If you are playing on desktop, click the Spin button or press the spacebar to spin.

### Autoplay

Press the AUTO button to commence automatic play of the game at the currently selected stake. Select how many spins to play via the Total Spins Dropdown menu.

### More Autoplay settings

Select the loss limit: The Autoplay will stop at the last spin before the loss limit is reached. The Autoplay loss limit should be higher than your stake.

Expand the AUTOPLAY dialog by choosing MORE AUTOPLAY SETTINGS. Here you can select additional criteria for the AUTOPLAY stop including - Stop if single win exceeds certain amount; Stop on Bonus Feature.

### Gamble Wheel

After a spin which results in a win of more than 0.10 EUR, the "Gamble" button is activated and the player may enter the Gamble game for a chance to increase their win.

The Gamble Wheel offers the player true odds and always plays 100% randomly with 100% RTP. The player can configure the Gamble using the following options:

Pressing the plus button increases the potential win on the ladder and recalculates the wheel's chances. Pressing the minus button decreases the potential win. The green section of the wheel displays the exact chance of winning. The red section displays the exact chance of losing. If the player commits to pressing the Gamble button, the pointer within the wheel will spin. If the pointer lands in the green area, the player wins the highlighted prize which they chose in advance. If the pointer lands on the red area the Gamble is over and the player returns to the slot game.

The player doesn't have to collect the winnings manually. They are auto-collected after every Gamble round. Press the "Collect" button to collect your winnings and return to the slot game. If the Gamble feature is closed, the player cannot return to the feature unless they win another round in the slot game. The Gamble feature is disabled during auto-play. Jackpot winnings cannot be gambled.

#### General types of games

Check the pays menu in the game paytable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

The prize value from one payline is equal to the total stake divided by the number of paylines, multiplied by the symbol multiplier advertised in the paytable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

Example: Total stake is 2. Total paylines are 20. Symbol multiplier for length of 5 is 300. The win for 1 payline with this symbol and length would be calculated as such:  $2 / 20 * 300 = 30$ .

The prize value from one payline in a Multiline game is equal to the stake multiplied by the symbol multiplier advertised in the paytable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid.

Example: Stake is 2. Symbol multiplier for length of 5 is 20. The win for 1 payline with this symbol and length would be calculated as such:  $2 * 20 = 40$ .

The prize value from one way or cluster in a Ways or Winning Clusters game is equal to the stake multiplied by the symbol multiplier advertised in the paytable. Where multiple wins occur on multiple ways or clusters, the total win values are summed.

Example: Total stake = 2. Symbol win multiplier = 2. Win =  $2 * 2 = 4$ .

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.

Please be aware that each account allows only a single game to be played at any one time. Therefore, a game should not be played on more than one device, or multiple games on the same device simultaneously. Doing so may lead to various errors.

In case of an incomplete game round due to connection loss where the result has not yet occurred, the game will generate an outcome for the round, which will be shown upon restoring of connection and the result will be visible in the Game History after refreshing the game.

In case of an incomplete game round due to connection loss where the result has occurred, but the player could not be informed of this fact, the game will inform the player of the outcome upon refreshing of the game and the result will be visible in the Game History.

For the best gaming experience, use of the latest version of software is recommended.

Malfunction voids all pays and plays.

RTP  $\approx$  XX.XX%
